## THIS IS THE STORY OF HOW HE CAPITAL SAVES YOUR TIME AND SAVES ITSELF

HE secret of any separator's ability to save time is, naturally, in the separating. And it is in the separating that The Capital saves time — for The Capital separates the butterfat from the whole milk in one single operation—separates it and discharges each separately and at

Of other types of separators, some are faster than others but no hollow-bowl machine machine that uses perforated cones, regardless of their size or number—can separate whole milk without again re-mixing and re-separating it, over and over, before it finally leaves the machine.

The Capital the whole separation process is complete in one operation. As the whole milk enters the revolving bowl of the wing-cylinder Capital, it is whirled between the wings in a multitude of thin films and the lighter contents—the butterfat— is forced by centrifugal action to the upper edges of the wings, whence it travels to the point of exit. The heavier skim-milk, drops to the bottom and is carried off at once.

The wing-cylinder Capital does not mix back one drop of the cream that has been once extracted; its constant whirling is continually extracting the rich butterfat, drop by drop, and removing it at once from the skim residue. There is, consequently, no waste of power, labor, butterfat or money.

And incidentally, The Capital gets 999-1,000 of all the creamsaves over five times the average waste of other types of separators. Another time-saving feature of The Capital is in washing up. The moment you drop the handle, an ingenious clutch drops and the bowl comes to a stop—ready to be cleaned without waiting for it to "run-down," and with no time for the milk to harden so that it is hard to wash away.

Remember, the machine stops of itself; there is no brake to rack it. Think of the saving on gear-wear that this quick stop stands for.

But we cannot begin to tell ail the features which belong exclusively to The Capital, here. If you're interested, we will be glad to send you our book, telling the full details

Factories: OTT/ VA and BROCKVILLE Branches: RECINA, SAGK.; EDMONTON, ALTA.; MONCTON, N.B.

"Turning Milk Into Money," contains a story of more intensive methods of dairy farming which ought to mean money in the pocket of every aggressive dairyman. This book has been written with the idea of attracting the attention of capable farmers toward dairying and to show them what can be done, provided the right methods of doing it are used. The story of The Capital Cream Separator is told in the book also — told from this viewpoint — the viewpoint of more cream from the same milk—the viewpoint of greater dividends. Wouldn't you like to read it? All you have to do is to send us your name and address and the book goes to you FREE and postage paid.

## Wipe out the Store Bill

Many people find when their yearly store bills are paid in the fall, that for twelve months' hard work they have had nothing but a living and are obliged immediately to obtain credit for the next year's supplies. They pay the highest price for what they buy on credit, and frequently there are unintentional overcharges which there is seldom any means of rectifying because the counter cheques have been lost.

Why not make the cows pay current expenses? They will do it with the assistance of a

## **New Improved** De Laval Separator

and will furnish cash for household needs from week to week, thus leaving the net crop returns as the foundation for a bank account.

A De Laval Separator of suitable size may be purchased in such a way as to avoid the outlay of a dollar which the machine has not actually earned, and to prove its ability to wipe out the store bill it is only necessary to apply to the Company or its nearest agent for a free trial.

MANITOBA WINDMILL AND PUMP CO. LTD. Box 301 BRANDON, MAN.

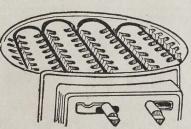

## Each grate bar has three sides-long wear

When only one side of a grate bar is continually next to the fire all the wear is concentrated on that one side. The life of the grate bar is thus naturally just onethird as long as when the wear is distributed on three sides.

That explains why Sunshine grates have three lives. Each of the four grate bars has three sides. Each time the ashes are "rocked down" (no shaking with Sunshine) the side next to the fire can be changed. Thus the life of the grates is greatly prolonged.

When desired, the heavy bull dog teeth on the grates will seize hold of clinkers, grind them up, and drop the particles into the ash-pan.

Buy the Sunshine—the durable, convenient, economical furnace, guaranteed by largest furnace makers in British Empire.

#### Flax on the Prairies

Flax has become a crop of some prominence on the prairies of the Canadian West. High prices, the inrush of settlers and an early When public stock yards are provided spring have resulted in a very big acreage in

properly managed, should relieve the situation some money from his land at the earliest opand encourage the men who have a natural portunity. But is it not economy to produce tendency to adopt live stock raising as a part a flax crop that gives a few dollars per acre and also infests the land with such weeds as One acceptable suggestion is included in cannot be eradicated in years of hard and perthe clause that provides for feeding and water- sistent effort? Some cannot afford to wait ing before weighing, though producers must a year before getting some cash returns, but not forget that a slightly lower price will something should be done to provide clean be offered on such stock. Most shippers, seed. Now is the time to keep watch on the however, prefer to allow a little when their flax fields and make a selection of whatever stuff has been filled out rather than accept area is considered best for producing satisany figure on it when it is shrunk to the last factory seed to be used next year. A little extra precaution in harvesting and handling may make it possible to have absolutely clean seed for another season.

#### The "Potato Bug"

Potato growers on the prairies gradually are making personal acquaintance with that destructive pest, the Colorado potato beetle, commonly known as the "potato bug." districts have not known his destructive powers yet; others have met him for the first time this season. However, this horny winged beetle, with the black and yellow stripes running lengthwise, sooner or later makes his presence felt wherever potatoes are grown. Eggs laid in the early summer soon hatch and give the tiny red young that eat ravenously and rapidly develop to a full grown larval form almost as large as the parent beetle that has

Paris green is the standard remedy for combatting this pest. It should be used when they first put in an appearance. Authorities advocate the use of a quarter of a pound to a barrel of water. In practice it is commonly used at about double that strength. In fact, the stronger it is the more satisfactory will be the result in destroying the "bugs." However, there is a danger of destroying the plants by burning the foliage if too much Paris green is used. A thorough application makes short work of the insects. Make sure you use it as soon as they appear. It will increase the yield of tubers-or at least prevent the yield from being decreased.

#### Immigrants Deported

A recent newspaper despatch reads:

"The stringency of the present immigration laws was illustrated on the arrival from Liver-This is a crop to which special attention pool of the steamer Corsican in Montreal last ditions under which the live stock of the should be paid. In many cases it is flax or week, when no less than twenty of the arrivals Canadian West are marketed will be much nothing on a great acreage. The supply of were held for deportation back to the old more satisfactory to the producers. For years flax suitable for seeding purposes is not country. The chief cause was not lack of the chief objections raised to Winnipeg as a equal to the demand, and anything that money, for one man had over \$175 in cash in stock market could be traced to a foundation is called flax is used. The consequence is a his pocket and most of them had sums ranging in lack of proper facilities at the stockyards. partial crop of flax and an alarming stand of below that amount. ### HORSE

#### Observations on Horse Subjects

As I was going along the road the other day I saw a pair of horses attached to a harrow, and what was intended to be a man on the end of the lines. I was almost persuaded that the man was not what he was intended to be, because of the way he abused those horses. Poor brutes, they were urged to go ahead; yes, scared into it, by a big stick, and then a lurch on the end of the line by this "man" brought one or both of them back more quickly than they had gone ahead.

This was not the first time I had seen "men" jerking horses. Such action is disgracefulshould be a punishable offence. there now are laws on the statutes that make such cruelty to animals a misdemeanor, but in rural parts it is seldom if ever enforced. there are some horses who have to be shown their places by harsh means, but when poor brutes, who know more than the "men," are so brutally treated something should be done. The fact is these "men" become out of humor and they must vent their wrath on something. Luck has it that horses are under his charge, and they have to suffer the consequences.

As a rule horses driven by persons who abuse America is to have some college trained and therefore how necessary it is that all such them show the effects of ill-treatment in the form of a superfluous amount of skin and bone and a dearth of flesh. How can it be otherwise? A few minutes' lashing about is harder on a horse It seems to me our government must have been than a whole day's work. Take a horse with some life in him and place him in the hands of a "man" such as is referred to above, and a few cuts with the line and a jerk or two unnerves or irritates him for the rest of the day. He not only wastes tissue in proportion to the actual labor he does, but also is nervous and sweats profusely-

As a rule the man who jerks a horse or otherthere soon was put at work at which he had to

It is difficult to say what should be done with They should know that horses we will not have a heavy crop. That means when properly broken in are more easily handled without abuse than with it. If they persist in ill-treatment they should be shown that such illports little stock is in the country. This branch treatment will not be tolerated. The horse is which should be valuable to the farmer as an too useful an animal to be subjected to such to impose on them without any real cause. A to control sensible horses.

EQUITANT.

#### The Royal Show

OUR ENGLISH CORRESPONDENCE.

Just how rapidly the Royal Show has grown in a generation is shown by a comparison of entries at Liverpool in 1877, with the show of this year. In that year the total stock entries were 1,292—this year they were 2,757. Horses 139 to 361. There was no poultry class in 1877

The Wavertree playground proved an ideal greatest industry. Fine was the show in every doubtedly the high quality of the live stock. In spite of years of draining from all the world Britain by her wonderful recuperative power can show year after year the cream of the world's

Some say that the day of the horse is passing, but the Liverpool entries contradicted the statement emphatically. The horse classes were very strong—perhaps the best in the society's history. The quality was especially noticeable in the heavy classes. Shires, Clydesdales and Suffolks all made an excellent display. Hackneys and Hunters were also good classes. To haul the tremendous loads of merchandise through the great Lancashire cities powerful draft horses largely used for this purpose.

There was no getting away from the quality of the Shires; there was not a weak class. The was scarcely inferior, H. B. Marshall's "Sarcede." yearling stallion class was not a large one, but The London winner, Sir W. Green-

Westminster's "Eaton Nonsuch" second. A strong class was the three-year-old stallion class. There was not much doubt as to the first in this class—Messrs. Ainscough's "Tatton Herald." F. Farnsworth's bay "Wakeful " was second.

The one-year-old fillies were a promising lot. A rare filly, John Bradley's bay "Halstead Royal Duchess" was first beating Duchess, was first, beating Lord Rothschild's "Lorna Doone. The London winner, "Dunsmore Chessie," was certainly leader of the two-year-old fillies and was followed by Ellis Potter's bay "Champion's" Choice." Threeyear-old fillies 'were few in number but of high quality. first place was easily taken by J G. Williams' "Bardon Forest Princess." "Medbourne Duchess" was second for B. N. Everard. The class for mares with foal at foot was the strongest class, and many noted mares were entered. Very close was the contest for premier place. It fell to a weighty short-legged bay "Lillesshown by the hall Moss Rose,' Duke of Sutherland. The second,

Messrs. Whitley's bay "Mollington Movement" was very little Walpole Greenwell.

Keen interest was evinced in the championship awards. the champion prize for best bull. He is a grand type of island-bred Jersey bull. The second in the class was also reserve for champion prize, J. De Knoop's "Inspector." Lord Rothschild also took the champion prize for best cow or heifer in milk with his whole-colored cow "Cute 2nd."

Guernseys were 23 in number, and the result was a practical sweep of the principal places for Sir E. A. Hambro's exhibits.

Dexters and Kerries were both good and wellfilled classes, and Red Polls were well shown.

SHEEP AND SWINE.

The sheep entries were characterized by allaround excellence. Long wools, short wools, and mountain sheep were all well represented. Shropshires were the biggest section, the entries numbering 117. As usual Sir Richard Cooper took most of the prizes, but he had strong competitors in T. S. Minton and R. Birch. The Royal exhibits were missed in the Southdown classes, but there was an excellent show of capital quality. The championship was taken by a shearling ram shown by F. H. Jennings; reserve to Mr. Adeane.

Oxford Downs were evenly balanced in quality. Messrs. Adams and J. T. Hobbs were the leading winners. For Hampshire Downs most of the honors went to J. Flower, but the champion prize fell to H. C. Stephens. H. Dudding took the champion prize and most of the first places for There were 83 entries of Romney Lincolns. Marsh sheep. The prizes were shared by several leading breeders. Wensleydales made a good display, and Leicesters and Border Leicesters were well represented. Taken as a whole the word whole the whole the word whole the this chance, but it is worth trying for. sheep exhibits were exceptionally fine.

The display of pigs was probably the best on record at the Royal Show. All the classes were well filled, and there were in all 361 entries. All 97 entries in the Large Whites the Earl of Ellespionship with a fine sow. The reserve for championship went to a boar hardly inferior, owned by Measures. The championship of the Middle Whites was taken by a massive boar, shown by L. C. Paget, a previous Royal winner. The Earl of Sefton was reserve with a grand boar.

The Berkshires were an evenly good lot. 18 months old sow was deservedly champion. She was owned by L. Currie. The reserve was another fine sow shown by H. Peacock. In Large Blacks, competition was keen amongst 57 entries. Last year's winner, owned by T. F. Hooley, was again champion. A big sow shown by J. Warne was the champion sow.

An unbeaten sow,  $3\frac{1}{2}$  years old, took the Tamworth championship for R. Ibbotson. Mr. Ibbotson took most of the first awards

Many awards in various competitions had not been decided at the time of writing, and these will be dealt with in another article.

Up to the middle of the show the attendance has been excellent, and weather conditions seem reasonably settled for the balance of the show. F. DEWHIRST.

#### Stallion Owners Fined

The Manitoba Horse Breeders' Association is waging a vigorous crusade against the practice of keeping stallions in stud without proper enrollment and registration of the animals. On Wednesday, June 29, five charges made by the association were heard in Mr. Justice McMicken's court, at Winnipeg. The several owners, Jno. Hall and Alex. Ross, both of Hazelridge, Albert Muller, Elmwood; J. R. Sutherland, Suthwyn, and Wm. Loganhan, Pine Ridge, pleaded guilty to failure to enroll stallions and to posting notice of said enrollment, and were fined.

The Kansas State Experiment Station conducted a number of tests with mixtures for preventing flies on cows, and obtained best results from one containing 1½ pounds of resin, two cakes common soap,  $\frac{1}{2}$  pound of fish oil and enough water to make three gallons. This may be applied with a brush, or if sprayed on the cattle pint of kerosene may be added. Half a pint of the mixture is enough for one application to each cow.

#### Shorthorn Herd Book

Volume 26 of the Dominion Shorthorn Herd Book has just been issued from the office of the Canadian National Live Stock Records at Otta-It contains the pedigrees of Shorthorns imported, Canadian and American bred recorded during 1909. Bulls included are numbered from 74093 to 77551, and females from 86120 to 89882.

#### Stock Farmers Up Against It!

A subscriber in Southern Manitoba, under date of July 4, writes that stock farmers in his locality are up against it, because of extremely dry weather and no prospect of feed. This is a serious problem. But there is yet time to provide feed, unless abnormal weather conditions continue.

Dry spells, such as the one that has struck some parts of the Canadian prairies, generally are followed by at least enough rain to cause seeds to germinate. No time should be lost in getting fields that are destroyed in shape for Then, when rain comes a mixture of oats and barley can be sown. In case sufficient showers develop this crop will grow rapidly, and can be cut for green feed.

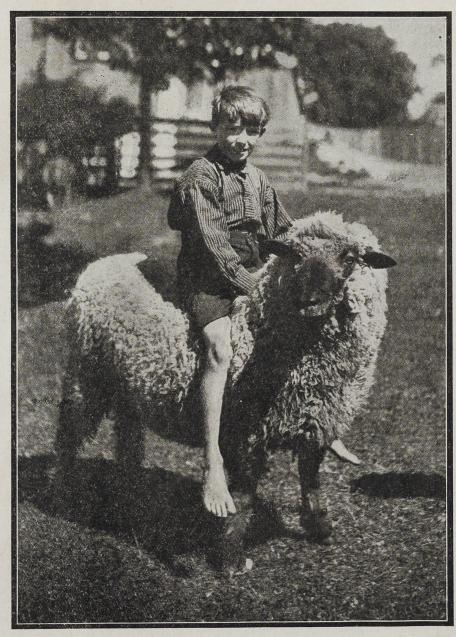

#### Counting the Cost

We cannot get something from nothing. the leading breeders were represented. Amongst Every bushel of grain, every ton of hay, straw, or live stock top market prices for all the feed they other product makes a definite draft upon the consume, and never take into consideration mere was the principal winner, taking the cham- fertility of the soil, leaving the soil poorer in what they are capable of doing in the way of

certain constituents than it was before. Aside from its fertility, land is valueless to the farmer. The farmer invests his money in land solely on account of the fertility which the land possesses, hence, we may say that the fertility of the land represents the farmer's capital. therefore, that the farmer who sells grain, hay, or other product of the soil, sells along with that product a part of his capital and, unless he makes provision for returning to the soil the equivalent of the fertility removed, he impairs his capital every time he makes a sale. We all know the ultimate result of soil robbing-impoverished farms and impoverished farmers, but it is strange how few people take this point into consideration when counting the profit or loss from growing and marketing a certain crop.

There is a homely saying that one cannot eat his cake and have it, but it is possible for the farmer to market his produce and still keep a large proportion of its most important part at home; important, at least, so far as he is concerned. By marketing his produce in the form of live stock, or some animal product, the farmer is able to obtain, as a rule, more than prevailing market prices for his crops, and retain upon the farm that which will enable him to produce crops at a lower cost.

Profit is not indicated by the selling price of an article, but is represented by the difference between the cost and the selling price. A sells his oats at 50 cents per bushel, it does not follow that he has a larger profit than B, who sells his oats at 45 cents per bushel. To decide which man had the larger profit, we would need to know how much a bushel of oats cost each of these men. In this connection we are often unfair in computing results of feeding operations. It is a common practice to charge up against our

QUIET ENOUGH FOR THE SHOW RING

decreasing the cost of producing subsequent = It is often objected that one should be careful in crediting live stock with the manure they produce, because a large proportion of the manure is often lost in the handling. It is true that there is often a great waste in handling manand should not be charged against them, but should be charged against the slipshod methods of the farmer who permits such a waste to occur.

means of marketing home-grown products. When to pay the grower's profit, and, in many cases, a middleman's profit as well, so that it is impossible to show very much profit in many cases where purchased foods are used. With homegrown foods produced upon fertile soil, it is impossible for a man to sell his produce in the form stock and taking proper care of the manure, crops are produced at a much lower cost than upon a farm where the crops are sold in their natural state. It is right here where the stock farmer should sell his crops at a lower price than the At the going prices for hogs what profit is there in grain farmer. If he gets as much per ton or per the business? Are you going in more extensively bushel as the grain farmer, he has a much larger for hog raising? If not, why not? profit, but when, as is usually the case, he gets more per ton or per bushel than the grain farmer, he has still further reason for congratulation.

A concrete case may make the matter clearer. Suppose, for example, a farmer buys a steer for \$40.00. He feeds the steer home-gown foods which, valued at market prices, amount to \$20.00, and the steer is sold for \$61.00. Most people would say that the farmer made only \$1.00 through feeding this steer, but there are other possibilities. Supposing it could be demonstrated that the food this steer consumed actually cost the farmer only \$10.00 to produce, then farmer's profit would be \$11.00 instead of \$1.00. Besides this, we must remember that the steer has left a considerable portion of the food he consumed in the farmer's barnyard, where it is available for reducing the cost of producing the next year's crop.

to charge against the animals what the foods products, it would be more nearly fair to charge rather than with the market value of the products. By charging home-grown foods at their actual cost against the animals consuming them we would necessarily be giving the animals credit for the improvement they have made in the fertility of the soil, because the true measure of this fertility is the extent to which it reduces the cost all foods consumed by animals at market prices, and counting as profit only what they return in excess of market prices, we should aim to find out how much we have received per ton or per bushel Editor Farmer's Advocate: for the foods the animals have consumed, and then we can gain a more intelligent idea as to whether our live stock is paying its way or not. To study the cost of production is sound business practice, but we cannot intelligently study the cost of producing our live stock without going further back and studying the cost of producing the crops upon which the animals are fed. - Prof. GEO. E. DAY, in O. A. C. Review.

Bisulphide of carbon on a piece of burlap or oakum, thrown quickly down a pocket gopher's burrow, preferably when the soil is moist, Prof. Washburn, Minnesota entomologist, says has killed many pocket gophers in his experiment work. He uses half a pint of bisulphide at a The chemical costs at wholesale is about eight cents a pint. Its gas is very poisonous, heavier than air, penetrates the burrow, and causes death by suffocation. The openings must be completely closed with dirt to prevent air going in. Do not use matches or a light when using bisulphide. It is dangerously explosive.

### FARM

#### Topics for Discussion

In recognition of the fact that valuable hints ure, but this is not due to any fault of the animals always are obtained from men engaged in actual farm work The Farmer's Advocate has adopted the "Topics for Discussion" column in order that our readers may see an open channel through Animals show to best advantage when used as a which they may inform their brother farmers as to practices that are worth adopting and warn foods have to be purchased, the purchaser has them against methods that prove unprofitable. Not only do we wish our readers to discuss the topics announced for the various issues, but also we desire that they suggest practical subjects on which it would be well to have discussion.

This notice appears under the "Farm" department, but the questions dealt with cover all though he may not get any more than market not exceed 600 words and should reach this office prices for his crops. The reason for this is easily 10 days previous to the date of its crops. seen. Under a system of feeding crops to live read carefully and a first prize of \$3.00 and a second prize of \$2.00 awarded each week. Other letters used will be paid for at regular rates to contributors.

July 20.-How much per pound, live weight, has a great advantage; he produces his crops at did it cost you last year to produce pork, a year in a low cost, and can make a profit even though he this case being from July 1, 1909, to July 1, 1910?

> July 27.—Describe what you consider a satisfactory poultry house for a farm flock of from 50 to 100 birds. Explain how this building is ventilated, how roosts and nests are arranged, what conveniences there are for feeding or handling the birds; in short, everything a farmer building a poultry house would like to know.

> August 3.-What suggestions have you to offer regarding treatment of cropped fields after the harvest is removed? How can weed seeds best be induced to germinate, and also how can provision for conserving soil moisture be made

> August 10.—Discuss disc plows, giving advantages and disadvantages for use in soils of different kinds. In what soil would you advocate their use?

#### Handling Flax Crop

Although many have advice to offer on the sowing of flax little has appeared regarding the In the case of purchased foods, it is necessary most satisfactory way of harvesting. Perhaps the hints given in reply to this week's topic for

In many districts little care is taken to avoid the animals with the actual cost of these products, undue loss in cutting flax and getting it to the thresher. It is a crop that must be studied. If ster to load his own load, to save tramping flax it ripens evenly and is free from weeds or other out. "Now," one farmer said, "you will see the green material, cutting with an ordinary grain threshing machine go to pieces." They said I binder is satisfactory. If dry weather comes it should not have tied it. The thresher shut off binder is satisfactory. If dry weather comes it should not have tied it. is all right to have it bound into sheaves. ever, as a rule weeds or grass are in evidence and did not do, as it was full of chaff and seeds, so he sheaves or bundles do not dry readily. of production. Therefore, instead of charging such conditions the plan outlined in our first out beautiful and clean, and a fine sample, and prize letter is most satisfactory.

#### Best Way to Harvest Flax

ways I thought my experience might be of interest want to thresh flax don't stack it, as it gets too to some of your readers. Some will say bind it. tough.

This way is all right, provided the flax is free of green stuff of any kind; otherwise you can't get it dry. Some will say cut with the binder without twine and dump three or four bundles in a place. I have seen this plan work out all right some years, other years it would be very objectionable. If it should rain these bundles will never dry out till they are turned up to wind and sun. In a wet fall you may have to repeat this half dozen times.

The plan I like best for any kind of a year is, remove the trip and compressor from the binder and let the flax run in a continuous stream; it will stand on end in a beautiful row and thin enough to dry out readily. When dry enough to thresh or stack take two horses hitched to sulky rake and drive along with the horses between swathes same direction as binder travelled, covering two swathes at a time. Dump about every twenty-four feet. If it is convenient to have the threshing machine there is never a better time to thresh it than when being lifted off the ground on a good hot day.

To gather, drive wagon across the swathes with a man on each side of the wagon. No one is needed on the wagon. In this way it can be gathered quickly and threshed with little loss.

It is difficult to advise as to proper stage of maturity. If there is no danger of winter setting in it can be left until the seed rattles in the prods. Then it dries more readily and threshes out to a good sample. However, if it becomes over ripe there is a big loss in cutting and gathering.

GEORGE TAYLOR

#### Heavy Crop was Bound

EDITOR FARMER'S ADVOCATE:

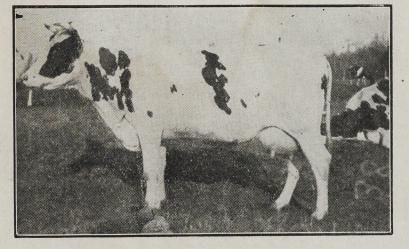

I have had success growing flax. My land is scrub and very heavy clay. Last year a piece of land on which I had grown one crop of oats was plowed about the end of May and sown June 1. I cultivated it well, and levelled it off by turning the harrows on their back and going crossways of the plowing. I had a splendid seedbed. I closed drill (a shoe drill) to sow about half a bushel to the acre, but when I got through I found I had sowed nearly a bushel to the acre. My neighbors, being settlers from the United States (old flax growers), said I would not get a crop, as I sowed too thick. I had a big crop.

I cut it on August 25, when it was very ripe. It stood about three feet high. I bound it with twine, it being very hot. I let the sheaves lie a while, and then stooked it in long stooks, cost, and if we knew the cost of home-grown discussion will be of benefit to some of our readers. about ten sheaves. About a week after I went round and turned the stooks.

I threshed from the stook, getting every teamall wind, afraid he would blow flax out. That put on all wind available, and the flax came went through the machine better than wheat. I got by weight at the machine 27 bushels to the acre, and the machine being an old one there was some wasted on the ground. I am As I have harvested flax a good many different trying some this spring on new land. If you WM. MACKLIN.

#### Drag Method of Stacking Hay

The hay-making season brings increased activity to the farmer. Especially is this so to the struggling homesteader who has laid claim to some acres on the expansive prairies. Even with the improved devices or well equipped farms making hay is rather a strenuous occupation. And on the homestead, where implethere are few ments and especially for stacking purposes, it is

FAFORIT BEAUTY, HOLSTEIN COW, OWNED BY HOMER SMITH, WINNIPEG

indeed a heavy task. puts up a certain amount of hay, for it is necessary to have this as feed for his stock. In some parts, and especially in central and northern Alberta, many farmers depend almost entirely on the hay crop for their livelihood. Thus it is that some notes on the different methods of stacking hay should prove of some value to the readers of THE FARMER'S ADVOCATE.

Perhaps one of the simplest methods, and what many claim to be the most efficient for stacking, is the drag method, using a rough pole having a thickness of one foot and a length of about fourteen feet. To each end of this pole a team is attached by a chain eight to ten feet in length. The hay is raked into wind-rows and bunched into coils by the rake. By driving down the row of coils it is possible to drag fifteen or twenty of them in one load. When the hay is loose and dry it is a difficult matter to stack by the use of the pole. After a couple loads have been drawn together, some attention must be given to the formation of the stack. Four planks are used to run the stacks up. Those planks are used to run the stacks up. planks are usually of two-inch thickness, ten inches wide and eighteen feet long. It is possible to buck the hay in this fashion until the stack becomes about fourteen feet high, when it will be necessary to use a wagon and rack

and it is doubtful if there is a more efficient method to be found, and one that can be operated at a minimum expense.

## FIELD NOTES

#### Alfalfa Competition

The Saskatchewan alfalfa growing competition has caught the popular fancy to a degree that was hardly expected, even by those most interested in the plan. The number of inquiries for information in regard to the rules of the competition has been large, and those who have sought expert advice in the growing of this important crop have not been few. Last spring, Superintendent Angus MacKay, Indian Head, who is one of the first and most successful growers of alfalfa in Saskatchewan, offered to give a sack of inoculated soil to any person who would pay the freight charges on it, and more than two hundred requests in a short time was the result.

The committee which has charge of the alfalfa

The committee which has charge of the alfalfa growing competition has received generous financial support from public-spirited persons such as President William Mackenzie, of the C. N. R. The secretary of the committee announces the acceptance of another generous subscription of \$250.00 from The William Pearson Co., Ltd., of Winnipeg.

Professor Thomas Shaw director of the Great

Professor Thomas Shaw, director of the Great Northern Railway's demonstration stations in the Northwestern States, was one of the party of expert agriculturists who toured this country less than a year ago. The Last Mountain Valley was visited by the party and after an examination of the soil there Prof. Shaw stated that it is eminently suited to the growth of alfalfa, which thrives best in a soil of limestone origin. stone origin.

#### Excursions to Indian Head

Almost every settler of hay, for it is necest for his stock. In some central and northern Alpend almost entirely on velihood. Thus it is that ent methods of stacking the value to the readers of TE.

simplest methods, and the the most efficient for the most efficient for thod, using a rough pole to the readers. Almost every settler present to entertain and give information to the cream, and also want the tariff on the same changed to cover 5, 10, 15, 20, etc., miles area, rather than 10, 25, 50, etc., miles as at present. Sweet cream and Supt. Norman M. Ross will welcome them at the forestry farm. A Winnipeg lady has been induced to attend and deliver an address each afternoon of "Opportunities for Women in Rural Districts." Mr. Norman M. Ross will also give an extremely interesting and instructive talk on gardening.

As special rates will be in force from all points from which patronage of these excursions is expected and the dates precede the busy harvest season, a record breaking attendance is expected. The Indian Head Citizens' Band has been engaged for the excursions.

Conservatives Win

Last Monday's elections in Manitoba resulted in the return of the Roblin Government. Incomplete returns on Tuesday morning give 26 Conservatives and 13 Liberals that are said to be elected, and two seats still in doubt. In a few ridings the vote is close and final returns may give slight changes. Hon R. P. Roblin had over 300 more than W. F.

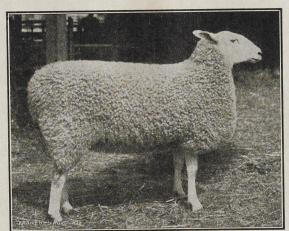

#### Excursions to Lacombe

Excursions are being run to the Dominion Experimental Farm at Lacombe, Alta. On July 29 special trains will run from Strathcona, Castor and Calgary. These excursions are worthy of patronage. Every farmer should interest himself in experimental work and results.

#### Stock Judging Contests

The live stock associations of Saskatchewan have, The live stock associations of Saskatchewan have, during recent years, endeavored to arouse a greater interest in the judging of live stock. A number of the agricultural societies arranged for judging competitions at the summer fairs, but neither at the annual winter fair nor at the summer fairs has the interest been as great as it should be. Perhaps in no other department of the Saskatchewan Winter Fair were the prizes so generous, proportionately. will be necessary to use a wagon and rack to top the stack off. With two men driving and a man on the stack it is quite possible to stack from twenty to thirty tons per day.

This method of stacking can be employed in the stacking of almost any kind of hay. When the hay is dry and loose it works most effectively and it is doubtful, if there is a more effectively and it is doubtful, if there is a more effectively and it is doubtful, if there is a more effectively and it is doubtful, if there is a more effectively and it is doubtful, if there is a more effectively and it is doubtful, if there is a more effectively and it is doubtful, if there is a more effectively and it is doubtful, if there is a more effectively and it is doubtful, if there is a more effectively and it is doubtful, if there is a more effectively and it is doubtful, if there is a more effectively and it is doubtful.

BORDER LEICESTER CHAMPION EWE

young men, the confidence which must follow participation in the competition, and the information given in the remarks of the judges should cause many more young men to take part in this competition this year than has been the case heretofore.

The secretaries of agricultural societies in Saskatche-

are glad to supply information respecting the stock-judging competition, and young men should now make up their minds to be there when the competition is on.

#### Dairymen Get Demands

The demands made by dairymen in Manitoba a couple of months ago have been granted. For some time the dairymen's association have tried to induce the railway companies to remedy grievances in regard to the shipment of milk and cream. For a time nothing was done, and the association executive laid the matter before the railway commission in Winnipeg on May 13. A detailed report of the case appeared in our issue of May 18.

The demands included a reduction in rates to conform with rates on American roads; agents to accept

The exceedingly popular excursions to the Dominion government experimental farm at Indian Head, which have been conducted annually for some years, are to be repeated this year and will be held on July 26, 27 and 28. Arrangements have now been completed whereby special trains from the following parts of the province will be run:

From Soo line points between Estevan and Pasqua and on the Arcola line from Antler to Regina on Tuesday, July 26th; from points on the Prince Albert line between Saskatoon and Regina, and from points between Maryfield and Wolseley on the Wolseley-Reston branch on Wednesday, July 27th, and from points on the main line between Fleming on the east and Mortlach on the west, as well as from Outlook branch between Outlook and Moose Jaw on Thursday, July 28th.

Special efforts have been made to provide a programme that will be extremely interesting and instructive. It is expected that Hon. W. R. Motherwell, Prof. W. C. Murray, Dean Rutherford, Prof. Gussow and Professors Bracken, Greig and Willing of the Saskatchewan College of Agriculture will be the defort the railway commission in Winnipeg on May 18.

The demands included a reduction in rates to conform with rates on American roads; agents to accept delivery of milk at platform or baggage room at point of shipment and give receipt; and return of empty cans by way bill so that lost cans may be traced.

The railway commissioners on hearing the evidence agreed that these requests were reasonable. They gave the railway companies thirty days to make satisfactory arrangements with the dairymen. When the dairymen when the train baggage men. No receipt side the matter before the railway 18.

The demands included a reduction in rates to conform with rates on American roads; agents to accept delivery of milk at platform or baggage room at the points of the province Albert land from points on the railway commissioners on hearing the evidence agreed that these requests were reasonable. They favore a reasonable with the matter before the railway 18.

Last Monday's elections in Manitoba resulted in the return of the Roblin Government. Incomplete returns on Tuesday morning give 26 Conservatives and 13 Liberals that are said to be elected, and two seats still in doubt. In a few ridings the vote is close and final returns may give slight changes. Hon. R. P. Roblin had over 300 more than W. F. Osborne. Hon. T. C. Norris had more than 200 of a lead over his opponent. All the cabinet ministers were returned. Ed. Brown was beaten in South Winnipeg by about 50.

Dates to Keep in Mind

Winnipeg Industrial Exhibition, at Winnipeg, July 13 to 23.
Inter-Provincial Exhibition, at Brandon, July 25

Saskatchewan Provincial Exhibition, at Regina, August 2 to 5. Stock Show and Race Meet, Edmonton, August 23

Stock Show and Race Meet, Edmonton, August to 26.
Canadian National Exhibition, at Toronto, August 27 to Sept. 10.
Dominion Exhibition, at St. John, N. B., Sept. 5 to 15.
Western Fair, at London, Sept. 9 to 17.
Central Canada Exhibition, at Ottawa, Sept. 9 to 17.
Provincial Exhibition, New Westminster, B. C., October 4 to 8.

#### Events of the Week

CANADIAN

Railroad telegraphers on the G. T. P. will receive increased wages.

One hundred and seventy-five Manitoba teachers left Winnipeg on July 6th for a tour of Great Britain. The city gave them a farewell luncheon.

Fire in Nelson, B. C., did much damage to town operty. The cause is unknown, and there is little insurance.

The jury at the coroner's inquest on the "Herald" disaster in Montreal brings in a verdict that no one can be held responsible for the catastrophe.

Members of the national commission on technical education at Ottawa will devote time this summer to a tour of Canada, United States and Europe, in a search for information regarding this work.

There is great rejoicing in Canada over the winning of the Steward's Cup in the Henley races by a Winnipeg four-oared crew. The Winnipeggers' style of rowing had been severely criticized, and the surprise at their win was great. They defeated the Mayence crew of Germany by two lengths. Another Canadian success is the winning of the Mackinnon Challenge Cup at Bisley, heading the list at all the ranges. The Kolapore Cup stays in England, Canadians being beaten by two points. beaten by two points.

#### BRITISH AND FOREIGN

Agricultural areas are to be opened for homesteading in Alaska by order of the American government.

The Pope of Rome has been ordered to take a complete rest. Too much activity in the heat caused fainting spells.

More than twenty people were killed and a hundred injured in a train wreck at Middletown, Ohio, owing to the collision of a fast express with a freight train.

The Johnson-Jeffries fight at Reno, Nevada, on July 4th ended with the total defeat of the white man in the fifteenth round.

A printing company in Indiana has taken the contract for printing a million copies of "Roosevelt in Africa." This is said to be the largest single order ever given to a printing firm.

GOING TO EDMONTON MARKET

## CALGARY'S GRAND SUMMER EXHIBITION

ALGARY'S summer exhibition of 1910 was a success. The faultless weather on the successful start. There were many features to make the exhibition on of considerable import. Numbers in attendance or a frivolous mob of mirth-seekers do not alone indicate the success of what is supposed to be one of the best agricultural and live stock exhibitions in the Dominion of Canada. While the crowds were in attendance, yet it was the live-stock showing and the grand agricultural and investors where the successful in the history of the association. The center of the most successful in the history of the association. The center of the agricultural half was taken up with piles of grain, the yield of each of which was certified on affiavit as the average of the nacres. Finer samples of wheat, oats and barley could scarcely be imagined. The grain was artistically arranged, precisely as if the grain were stored on a granary floor.

However, it was the live-stock schibit that proved the sensational feature of the exhibition. Calgary that the could be applyed to the successful of the successful in the successful of the successful of the successful in the successful in the successful of the successful o

is always assured of an excellent showing of the equine classes, and in this regard there was no disappointment. The cattle classes were well filled, and especially so in the dairy breeds. There was an exceptionally fine display of dairy cattle. B. H. Bull & Sons had a long line of Jerseys and they were the principal exhibitors of the cream cows. Ayrshires and Holsteins were present in goodly numbers, many leading herds in the province being well represented. Much interest centered in all the live-stock classes, but especially in dairy breeds. The Shorthorn had the strongest representation of the beef classes, a display that might find prominence in international realms.

There was a strong entry in almost every class

in international realms.

There was a strong entry in almost every class of the different breeds of horses. In no breed did there seem to center any superior distinction, as far as numbers were concerned. The draft classes, as usual, were the object of much interest, for many old-time winners were out in competition with the newcomers. A few years ago the Clydesdale horse put up the best showing, but to-day other breeds put forth almost as great. Albert Ness, of Howick, Quebec, made the awards in the heavy horse classes.

CLYDESDALES

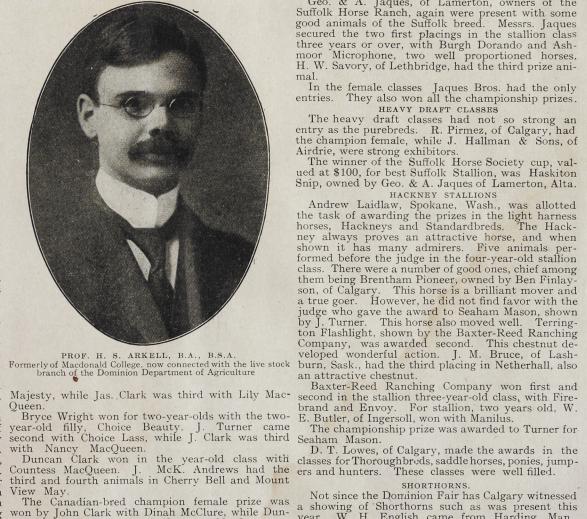

Quebec, made the awards in the heavy horse classes. CLYDESDALES

The stallion class for four years or over brought out fourteen entries, a line-up that presented a number of good ones. Main Spring, an active black, owned by Duncan Clark, of Crowfoot, Alta., headed the list. This horse is a good goer, but he might be asked for a little more weight, yet in quality he does not lack. Orpheus, a bay showing more size and owned by Angus McIntosh, of DeWinton, stood second. This horse is now ten years old, and he does not show the quality of limb he once possessed; otherwise, he might have gone higher. Royal Blacon, shown by J. M. Bruce, of Lashburn, came third. He combines size with considerable quality. Viscount Lothian, shown by C. R. Ingleby, of Strathmore, was fourth. This entry showed wonderful action, and, besides, possesses considerable quality.

Three entries in the three-year-old class confronted the judge. Bay Ronald, owned by Duncan Clark, a colt that was included in his recent importation, stood first. Jas. Clark, of Crowfoot, followed with Colonel MacQueen, a Canadian-bred colt that was a winner at the spring show. Edward Hodges, of Magrath, was third with Oak Leaf, an imported bay that possesses considerable size and quality.

John Clark won in the two-year-old class with Sir Norton, a promising colt. A. C. Timmons, of Calgary, got second with the Prince Hugo, of Willow

John Clark won in the two-year-old class with Sir Norton, a promising colt. A. C. Timmons, of Calgary, got second with the Prince Hugo, of Willow Edge. There were only the two entries in this class. In the yearling class John A. Turner, of Calgary, got first and second on Middleman and Granite Prince. The former colt possesses much quality and superior action. He was awarded the Clydesdale champion stallion prize and also the prize for the champion stallion. J. M. Bruce had the third prize yearling in Tighnduin Baron.

third and fourth animals in Cherry
View May.

The Canadian-bred champion female prize was won by John Clark with Dinah McClure, while Duncan Clark had the reserve in Countess MacQueen.

The champion Clydesdale female prize was awarded by the judge to J. Turner for Poppy, the two-year-old filly.

The champion Clydesdale female, any age, bred in Alberta, was Dinah McClure, owned by John Clark.

PERCHERONS

a couple of entries. R. Pirmez secured most of the championship prizes.

SUFFOLK PUNCH BREED

Geo. & A. Jaques, of Lamerton, owners of the Suffolk Horse Ranch, again were present with some good animals of the Suffolk breed. Messrs. Jaques secured the two first placings in the stallion class three years or over, with Burgh Dorando and Ashmoor Microphone, two well proportioned horses. H. W. Savory, of Lethbridge, had the third prize animal.

Not since the Dominion Fair has Calgary witnessed a showing of Shorthorns such as was present this year. W. H. English came from Harding, Man., and Caswell Bros. journeyed from Saskatoon, Sask., to compete for honors against the Alberta herds. In every Shorthorn class the competition was keen. P. M. Bredt, of Regina, made the awards, and while his task was a difficult one, yet it was quite satisfactory to most concerned. Four animals faced the judge in the class for bulls, three years and over. Mikado, a roan sired by Crusader, found the favor of the judge. He was owned by W. H. English, of Harding, Man. Spicy's Wonder, shown by Jos. Caswell, of Saskatoon, was second. This bull is a very typy lad and is well-fleshed, but is not so active on his feet as the animal placed above him. J. M. Bruce, of Lashburn, Sask., won third with Ironduke, and Thos. Crosford, of Airdrie, owned the fourth animal.

Bull, two years old, had a class of three. James Wilson, of Inniefail, owned the property of Inniefail, owned the property of Inniefail owned the in Tighndum Baron.

FEMALE CLASSES STRONG

The Clydesdale females put up a strong showing perhaps the best in the history of Calgary exhibition, and he made some important winnings. The broad more class brought out six entries. John A. Turner won first with Rosie McLaren; John Clark, Gleichen, second with Bogdavie Queen, and A. C. Timmins, of Calgary, third with Bloomer. In the fola class J. Turner came first with a get of Rosie McLaren; A. C. Timmins, second, and J. W. Hayes, of Calgary, third.

The prize for mare and two of her progeny was won by James Clark, of Crowfoot; A. C. Timmins, second, and James Urquhart, of Calgary, third.

The prize for mare and two of her progeny was won by James Urquhart, of Calgary, third.

The class for dry mare, any age, nine entries lined up before the judge. A. J. B. Dewdney, of Calgary, headed the list with Proud Beauty, a mare that was a previous winner and possesses plenty of substance. Ben Finlayson, of Calgary, came second one carrying an excellent top as well as being well.

#### WEEKLY MARKET REVIEW OUR

Monday, Tuesday and Wednesday of last week saw (cash wheat in Winnipeg advance from 98‡ to 105‡ cents per bushel. In all options the rise was in keeping with this jump. On Monday there was no market in the United States, but that did not prevent an advance of 2½ cents in Winnipeg. This advance was caused by the fact that many had sold short before the holiday. In addition continued dry weather provided bullish news. Increases that continued during the first half of the week were noticeable in Canada, United States and also across the water. On Wednesday the bulge was 3 cents. However, on Thursday there was little trading, the tendency being to await the arrival of the United States report. It came on Friday and proved to be bullish, being very much so for spring wheat. Grain news from all sources was bullish. The result was a jump of 4 cents on Saturday, bringing the price for cash wheat up to \$1.08 per bushel.

Live stock markets were comparatively quiet. From Saturday to Monday there were large arrivals of cattle, but very few were butchers' stock. Prices remain about the same as for the preceding week for cattle and hogs.

GRAIN

After a rest on Friday and Saturday, Winnipeg Grain Exchange was full of activity on Monday, and prices advanced from Thursday's close. There was nothing doing at Chicago, Minneapolis or other American centers, but that did not prevent local men from doing business. Although weather reports contained information that a few points in the Canadian West had been [avored with showers, the precipitation was not sufficient to bear prices. On Tuesday both Winnipeg and American markets continued the upward trend, Chicago July showing a gain of 4 cents, and Minneapolis September an advance of 41 cents, Liverpool cables closed 24 up.

On Wednesday there were reports of heavy rains in various parts of the American and Canadian Northwests. Prices opened below Tuesday's close as a consequence, but it was soon learned that these reports had been exaggerated, and the bulls again to 2 to 3 cents wa

ware fairly large. Prices offered failiged from \$5.00 to \$6.50.

In Toronto also there was a scarcity of butchers' stock. Exporters of quality, too, were not plentiful. In Chicago, toward the end of the week there was a break in prices. On Friday there was a drop of 10 or 15 cents. Sheep too tended to go lower.

#### Whose Fault Is It?

Editor Farmer's Advocate:

A few weeks ago there was a letter in your journal regarding the management of our country schools that met with my entire approval, and which deserves the attention of every man and woman who has the interest of a child at heart. In our own school in this district there is no provision whatever made for drinking water for the children, and every pupil who has not a session, and are we not taking even ordinary bottle of drink provided for them at home is care of them, while present evils exist? And likely to take a drink from a nearly-dry creek, which is foul from cattle and horses. No attention is paid to beautifying the school grounds, or of even keeping the buildings clean and in and more firmly, rests in the hands of the mothers I vow I have been more greatly, more noble out an epidemic of mumps and whooping inces any woman ratepayer has the school my living at school-slavery, teaching to children cough. Pupils and teacher alike attended this franchise and is eligible for office on school school affected with these diseases, and the boards. There are many school sections in properly cleaned ever since. and yet that if there is one place in the manage- them—have no inclination, and say they have triangles — unless he is a professional scientist, ment of public affairs where a woman would no time to interest themselves in school mat- when he can begin to specialize in mathematics

board, especially of country schools. As a usual thing a woman is not penurious where a child is concerned, and a woman would not be likely to favor the application of any teacher just because of the "lowest tender." By the expenditure of a few more dollars a very much more experienced and qualified teacher could be obtained. I feel quite certain that the neglected state of some of our schools would be immediately improved if a woman were on the school board, and, if the teacher happened to be a progressive kind, would she not be surer of sympathy in her efforts?

We boast of our school system as being inferior to none in the world, and, yet, I would like to point out two very grave mistakes which we are The first is in having so making. many inexperienced teachers in the country schools. Now, of course, every teacher has to put in their "first" year, but I do contend that an inex-

perienced girl will do less damage in a town like to hold office and who have an aptitude for can aid her with advice, and where she has a doings than on the equipment and general con-ceive it? principal to rely on for guidance, in discipline, dition of the school. It is up to the women, management, limit table requirements, etc., if any improvement is to be made. The teacher than if you take this same girl and place her coming new into the section cannot be blamed in a country school, turn her loose to her own if she measures her enthusiasm and desire for free will, with no overseer but the inspector, improvement of the surroundings by that of the who may, or may not, visit her once a year; and residents. If the mothers and fathers do not we cannot wonder if the result is often extremely care that their children live the most of their disastrous, both to the moral and mental growth waking day in a place a little less comfortable of the pupils. And why should the country than the stable, and a little cleaner than the nearly always have the inexperienced? One pig pen why should she be anxious? For the reason is that in some graded school at least credit of the average teacher it must be said the school board have a rule that none need that she does care more and does work harder apply without some experience, and perhaps to make things better than the parents do, another reason is that the young teacher asks a but she hasn't half the opportunity to make big little less salary, and so is gobbled up by the reforms. Our system of education is as good country trustee. And, after all is said, the coun- as the best; our educational surroundings are try school pays much the best salary. THE GLEANERS

Across the stubble-field the wagons go With lilting laughter and glad harvest song; And in their fresh-made track, shy pensioners Advance, vibrate, retreat the whole day long. The proud, young, feathered mother from the barn Brings here her fluffy, chirping, yellow brood; The plump quail feeds, unfrighted and unharmed; The squirrel feasts and flies; in bolder mood The timid field mouse waits to fill her nest; The wee ant staggers off with precious pelf; And flocks of chattering birds, bold highwaymen, Take tribute from the loaded wain itself. The happy children, riding on the sheaves, Would drive these daring bordermen away. The farmer, turning hastily around With kindling eyes and softening face, says: "Nay, Our bins are bursting with God's gifts. Be still.

It is sincerely to be hoped that the readers of

They are His gleaners. Let them eat their fill." -The Independent.

#### On Teaching Mathematics

"I fixed myself to work today. After all. I am not an idler. I earn my right to live. When publish my history the world will be thy richer by something, poor though it may be. employed of late years, than I was when I earned the most useless, the most disastrous, the most soul-cramping branch of knowledge, wherewith pedagogists in their insensate folly have crippled the minds of their fellow creatures—elementary mathematics. There is no more reason for any human being on God's earth to be acquainted I am absolutely opposed to women suffrage, The men of a section—the large majority of with the binomial theorem or the solution of

> in law or the surgeon in anatomy—than for him to be an expert in Choctaw, the Cabala or the Book of Mormon. I look back with feelings of shame and degradation to the days when, for the sake of a crust of bread, I prostituted my intelligence to wasting the precious hours of impressionable childhood, which could have been filled with so many beautiful and meaningful things, over this utterly futile and inhuman subject. It trains the mind—it teaches boys to think, they say. It doesn't. In reality, it is a cut and dried subject easy to fit into a school curriculum. Its sacrosanctity saves educationists an enormous amount of trouble, and its chief use is to enable mindless young men from the universities to make a dishonest living by teaching it to others, who in their turn may teach it to a future generation."-Morals of Marcus.

Why is it that pity looks like a virtue when school, where she is surrounded by those who keeping a keener eye on the teacher and her you bestow it and like an insult when you re-

> There are some hearts like wells, green-mossed and deep

As ever summer saw;

And cool their water is—yea, cool and sweet— But you must come to draw.

They hoard not, yet they rest in calm content, And not unsought will give;

They can be quiet with their wealth unspent, So self-contained they live.

A remarkable book find has just been made by a poor Jewish youth in Whitechapel. He bought for a half-penny from a barrow in Mile End Road a copy of Goethe's poems enriched with Thackeray's signature and crest, and a number of his thumbnail sketches scattered throughout the book. The covers were in bad Another great mistake we make, and one peal for practical suggestions. Probably no condition, but the pages were clean. The youth

#### SEASONED WITH SALT

Let your speech be always with grace, seasoned with salt.—Col. iv.: 6.

Several months ago I received a letter from one of our readers asking me to write on the subject of Sunday-afternoon conversation. My correspondent—like many country residents—lives too far from a church to attend more than one service each Sunday. She says that the friendly talk with a neighbor, which fills up the afternoon and evening, soon drifts away from discussion of the morning sermon into secular talk. She is disappointed, and feels that the Sunday is not the inspiration of the week, as it might be.

If I have taken a long time to answer Several months ago I received a letter

If I have taken a long time to answer this letter, it is not because I fail to see its importance, but rather because I have not words forcible enough to help

see its importance, but rather because I have not words forcible enough to help those who are struggling to overcome a similar condition of things. Words are strange things. Sometimes they are like froth and seem to have no power at all. Then, at other times, we realize that there are mighty for good or for evil. Of course, it is the character behind the words that tells most. One man may speak or write very fluently and make little impression, while another says a few quiet words which go straight to the heart of the hearers.

But I think my correspondent is right in desiring to have the Sunday conversation more helpful than a dissertation on the state of the crops or the latest fashion in millinery. God gives us Sunday to draw us higher, nearer to Himself and to each other. It is a day when we should take time to look up into our Master's face and grow strong through quiet fellowship with Him. He calls us apart from the ordinary work of the week to "rest awhile"—rest not only our bodies, but our minds and spirits. If we let the thought of the work fill our hearts, revealing itself as it always does in our conversation, then we lose the chance of drinking in joy and power and the invigorating touch of God.

Now, I am not suggesting that conversation on religious topics should be rigidly insisted on all through the hours

## Hope's Quiet Hour

thought of these things slip into our minds.

But we do want to spend God's holy day with Him. That is our privilege as well as our duty. And we want to be refreshed and strengthened by happy talk about spiritual things. It is an opportunity to be eagerly seized. Our speech should not be frivolous or stupid at any time. The Apostle's command is to let it be "with grace, seasoned with salt." The red-letter times of our life are the times of real heart-to-heart communion with other souls. These may be hours of spiritual fellowship only, times when we reach out through Christ, secretly and silently, and touch a heart that is dearest to us. Or they may be the rare moments when words are the real, quickening medium of spiritual fellowship. One of the joys of the life beyond death will surely be the joy of expressing our inmost selves. But even here we can do it far better than we usually do.

My advice is to make it the subject of definite and exprest prayer. Ask God

My advice is to make it the subject of definite and earnest prayer. Ask God to direct the conversation so that it may be inspiring. We all prefer a talk on the mysterious realities of the invisible caus us apart from the ordinary work of the week to "rest awhile"—rest not only our bodies, but our minds and spirits. If we let the thought of the work fill our hearts, revealing itself as it always does in our conversation, then we lose the chance of drinking in joy and power and the invigorating touch of God.

Now, I am not suggesting that conversation on religious topics should be rigidly insisted on all through the hours of Saturday and Monday. Conversation is worth very little if it is formal and unnatural. Out of the abundance of the heart the mouth speaketh. If

De inspiring. We all prefer a talk on the mysterious realities of the invisible life within, around and above us, to a wearisome discussion of outside topics. Then draw into the circle of speakers some of the great thinkers who will gladly take their share. This is easy in these days when the noblest thoughts of the noblest thinkers—as far as they have been able to express them in words—are set down in print. Prepare for the Sunday talk as you prepare for the Sunday dinner. Have bits marked in various books or papers, and take an opportunity of reading enough to start to conversation. Or read these bits over and over, and think about them urtil they naturally color your talk.

Above all keep fresh in your heart the

with the desire to hear Him. And if He wants to reach a town through you, He can do it as easily. Only look up into the Face of the Living Christ—He can converse with you as with the woman of Samaria. "Speak to Hm, thou, for He hears."

DORA FARNCOMB.

we think of the highest things, then our everyday talk will reveal it plainly, and there is nothing wrong in letting our Sunday conversation occasionally drift into discussion of earthly matters, any more than it is wrong to let the thought of these things slip into our minds.

But we do want to spend God's holy day with Him. That is our privilege as well as our duty. And we want to be refreshed and strengthened by happy talk about spiritual things. It is an opportunity to be eagerly seized. Our speech should not be frivolous or stupid at any time. The Apostle's command is to let it be "with grace, seasoned with salt." The red-letter times of our life are the times of real heart-to-heart communion with other souls. These may be hours of spiritual fellowship only, times when we reach out through Christ, secretly and silently, and touch a heart that is dearest to us of the life beyond death will surely be the joy of expressing our inmost. Salves. But even here we can do it far better than we usually do.

My advice is to make it the subject of My advice is t hurry he is in! He never even noticed us!"

Remember that it is not a very terrible thing to try and fail—the real failures are the people who are so afraid of failing that they don't try, or only try once or twice. Jacob A. Riis says:

"Some defeats are only installments of victory." But it is foolish to invite defeat by going unprepared. If we wish to keep the general home conversation at a high level, we must read inspiring books, think holy thoughts, and drink in more and more of God through daily communion with Him. And we must cultivate tact and sympathy, entering into the thoughts of others instead of dragging them by main force the way we want to go. There is the fragrance of beautiful courtesy in our Lord's conversation with a woman by the wayside, as described in the fourth chapter of St. John's Gospel. He leads her thoughts ing, swearing and foul language was common. How far did his words affect me or keep me from falling into those under the me or keep me from falling into those under the me or keep me from falling into those under the me or keep me from falling into those under the me or keep me from falling into those under the mother with frilled-bordered, white, mutch cap and spectacles, who looked so kindly at me and raised a warning voice to beware, and wo never allowed my brother or me to be out on street after dark. Curfew bell rang at 9 o'clock. I started to learn to smoke, but took very sick from it, dropped it, and subscribed from it, dropped it, and subscribed from it, dropped it, and subscribed the properties and the properties of the properties of the properties of the properties of the method habits, or the mother with frilled-babts, or the mother wit

## WESTERN WIGWAM

#### PLAYING THE ORGAN

Dear Cousin Dorothy:—This is my first letter to your nice club. My father has taken The Farmer's Advocate for about two years. I have five brothers and one sister. I am sending a two-cent stamp for a button. We have

COME AGAIN AND TELL US MORE

Dear Editor:—I have been much interested in the letters in your paper in the Western Wigwam column, and being a Western girl, raised on the Western prairies, perhaps my experiences might interest the girls who live in the wheat country.

I ride to school every day on white pony that I

in the wheat country.

I ride to school every day on my white pony that I call General White. He is a little beauty, right up on the bit; and, talk about flying, he can just skim over the badger and gopher holes like a swallow. The reason I call him General White is because he was a little foal when General White was shut up in Ladvernith in South Africa during the General White is because he was a little foal when General White was shut up in Ladysmith in South Africa during the Boer war, so my pony was called the General. I have also a little Shetland pony, Little Jim, but I am getting too big to ride a Shetland, and I can't very well help father punch cattle on a Shetland. They are too slow and not big enough to hold a good husky calf in the rope, as my brothers and I have to help gather at round-up time. Your prairie girls should just see the fun then. Talk about riding a bucking broncho! Why, some of the boys say some of them are harder to ride than a grindstone when it is being turned. We do not bother with any sidesaddle on this ranch. Father says they are too hard on the horse's wethers; besides one cannot tie up anything to a sidesaddle, so stock saddles we all use and cinch them good and tight.

Alta. Western Cowgirl (13). on this ranch. Father says they are too hard on the horse's wethers; besides one cannot tie up anything to a side-saddle, so stock saddles we all use and cinch them good and tight.

The Green Paper Doll

The Green Paper Doll

"Oh, Martha!" cried Betty, "it's more than a party—it's a house-party! At a lovely country place—Dorothy's cousin's—and we're to stay from Wednesday to Saturday! Isn't that grand?" It was so grand that Martha could scarcely realize it.

"I go?" she said. "For three whole days! Oh! what a party!"

"Yes, it's going to be lovely," said Dorothy. "A May party on Friday and lots of picnics and things on the other days. Will you go with us, Martha?"

"Indeed, I will! I'm sure mother will let me. But, girls, I don't know if my clothes are good enough for such a grand place."

"No; we're to go, all right; but let me. But, girls, I don't know if my clothes are good enough for such a grand place."

"Oh, Martha!" cried Betty, "it's more than a party—it's a house-party!

"I was so grand that Martha could scarcely realize it.

"I go?" she said. "For three whole days! Will you go with us, Martha?"

"Indeed, I will! I'm sure mother will let me. But, girls, I don't know if my clothes are good enough for such a grand place."

"I was so grand that Martha could scarcely realize it.

"I go?" she said. "For three whole days! Will you go with us, Martha?"

"Indeed, I will! I'm sure mother will let me. But, girls, I don't know if my clothes are good enough for such a grand place."

the McGuire library one afternoon in early May.

"What's the matter, Dotty?" asked Betty. "The party isn't off, is it?"

"No; we're to go, all right; but Jeanette can't go. She has such a cold, her mother won't let her go away from home. And I've just come from there. She really is ill; isn't it was had?"

"Mrs. Taylor was delighted to have

Yes, indeed it is! We would have

"Yes, indeed it is! We would have had such a lovely time, all together,"
"Well, we'll go, anyhow. And, Betty, as Irene expects three of us, I think it would be nice to ask someone to go in Jeanette's place. I'd like to ask Constance Harper, but I know you don't like her much."
"Oh, I like Constance well enough, but she doesn't like me."
Well, whichever way it is, you two never seem to get along very well together. But who else is there?"
Betty hesitated a minute, then she said:

said:

"I'd like to ask Martha Taylor."

"Martha! Why, Betty, nobody likes Martha. And well—you know Martha, poor girl, has to count every penny, and—and she never seems quite at her ease—not that that's anything against her, but she wouldn't have pretty dresses and hats, and the people at Halstead House are often dressy and gay." and gay.

know it; but if Martha doesn't "I know it; but if Martha doesn't mind that, we needn't. And, Dorothy, you don't know Martha as well as I do. She never has any good times, and it's that that makes her shy and awkward. Oh, do ask her to go with us, if only for my sake."

"Betty, what a queer girl you are! I like Martha well enough, but I don't believe she'll go with us. I'll ask her, though, as you're so set upon it."

"What's this enthusiastic discussion all about?" asked Mrs. McGuire, paus-

ing at the library door, as she was passing through the hall.

"Oh, mother, come in!" cried Betty.
"What do you think, Jeanette is quite

"What do you think, Jeanette is quite ill and she can't go with us to the house-party at Irene Halstead's."

"That is too bad; I'm very sorry. Shall you ask anyone in her place, Dorothy?"

"That's just what we're talking about, Mrs. McGuire. Betty thinks it would be nice to ask Martha Taylor, but I don't think she quite fits in."

"But think how she'd enjoy it! Martha almost never gets invited to a lovely outing like this one you have in prospect. Why, she'd be overjoyed to go."

and do it heartily and kindly. Let her feel that you really want her to go with you."

"Yes, do," said Betty: "and, truly, Dot, if you ask her as if you wanted her, and if you treat her cordially, you'll be surprised to see how gay and jolly Martha will be."

"All right," said Dorothy, agreeably; "I really do like her, and I'll do my best. Come on, Betty, let's go and ask her now." her now.

her now."

Betty whisked away, and returned in a few minutes with her hat on, ready to start. It was but a short walk through the bright May sunshine to Martha's house, and they found her in the garden, watering some flower seeds she had just planted.

"Hello, Martha!" called the two girls, and she came running to meet them.

"Come, sit on the years delivered."

Come. sit on the veranda, said; "it's so pleasant there. I'm glad you came to see me."
"We've come to invite you to a party," said Dorothy, plunging into the

subject at once.
"A party!"- exclaimed Martha
Where?"

what you wear."

Mrs. Taylor was delighted to have Martha go with the other girls, and at once set about furbishing up her wardrobe as best she could.

And, indeed, when at last the day came to start, Martha, in her trim, neat travelling suit, looked almost as well-dressed as the other two. They were to travel in charge of Mr. Halstead, Dorothy's uncle, who was returning to his country home after a short trip to Boston.

He was a genial, affable sort of man

He was a genial, affable sort of man, but after a little kindly conversation he left the girls to entertain themselves and became absorbed in his paper.

Martha was as happy as a bird. The prospect of the good time coming seemed to transform her, and she was so gay and merry that Dorothy concluded she had misjudged her, and that Betty was right about her. Betty was right about her.

When they at last reached Halstead buse, Irene was on the veranda to House, Iregreet them.

She kissed her cousin Dorothy and greeted her warmly, and then welcomed the other two as Dorothy intro-

## BOYS' CLUB

#### A DANDY LETTER

Dear Editor:-You asked us to write

Dear Editor:—You asked us to write before the busy season comes on and so I will do my best. This club does not seem to have many members so far, and I am wondering what is the age limit. I think the Ingle Nook page the most interesting in the paper—the letters are so long and interesting.

I remember one of the boys a good while ago asking where kingbirds built their nests. I have found one in a poplar about ten feet from the ground, and I know someone who found one in a thresher. I think they often build nests near farms, but their nests are hard to find generally.

We have a splendid place here for birds, and I take a great interest in them. Last year we had a small pond just in front of the stable and a couple of mallard ducks raised seven young ones on it. We had tame ducks on it too, but they did not often go together. This year the ducks came back, but have not built as the pond has dried up, owing to the hot weather. We also had a horned grebe, greater yellowlegs, plovers and sandpipers. A golden eagle has visited us twice from the Rockies, which are about sixty miles away, and stayed some days quite close to the house. Do any of the boys get humming birds in their gardens? We have been here three summers, and they have come every one and built here, although I have never been able to find their nests. We grow scarlet runner beans, and they like the flowers of them far better than anything else in the garden. They are very fond of the wild honeysuckle in the woods also. Last year we had heaps of flickers round the place and young ones got in the house; but this year and other years there are none closer than the creek, the place and young ones got in the house; but this year and other years there are none closer than the creek, three miles off San anyone explain this?

there are none closer than the creek, three miles off San anyone explainthis?

We never shoot or disturb the birds, and they are getting more numerous every year. We had to shoot some magpies, because they were taking the very young chickens, but we leave the big hawks alone, as they do not worry us and they take the gophers. We found two young gophers in a hawk's nest once. I am not sure that it is not a mistake to leave the hawks alone altogether, as they are so very numerous (we can count twenty in the air in the evening often), and I know they destroy robins' and other birds' nests that I have been watching.

We are very lucky in the way of animals for the naturalist to study, but a lot of them are very destructive. We have seen coyotes, lynx, badgers, porcupines, mink, weasels and lots of others. A mountain lion came down here from the-mountains four years ago, and a wolf or two was seen quite close here last winter.

All insects seem very common this year, especially butterflies. I expect the rain kills a lot of them most years. It is funny that the most uncommon sorts in the old country are the commonest here—Camberwell beauty, scarce swallowtail, tailed blue, white admiral (the red admiral is common there, but scarce here), pale-clouded yellow and lots of others.

At Banff, in the museum there is a grand collection of Alberta birds and enimele, but not a very good one of a primale, but not a very good one of a part of the part of the very good one of a part of the part of the very good one of the part of the part of the very good one of the part of the par

At Banff, in the museum there is a grand collection of Alberta birds and animals, but not a very good one of eggs, and a very poor one of butterflies.

I must stop now or nobody will read to the end. I am very interested in natural history, but I don't know that the other boys are.
Alberta

Alberta GOLDEN EAGLE.

(There are just forty-seven members of the Boys' Club yet. There isn't really a hard and fast age limit. Any boy is welcome who is old enough to be interesting and young enough in feelings—quite apart from years—to be interested in boys and their affairs. Your fine "bird" letter brings you into the club with three characterists. GOLDEN EAGLE fine "bird" letter brings you into the club with three cheers and a tiger. I hope you will write again. I envy you your life among the wild, live things.—Ed.)

Philadelphia physician, in declaring that insanity was frequently productive of sound logic tempered by wit, told the story of a patient he once met in an asylum.

He came across this patient while strolling through the grounds, and, stopping, spoke to him. After a brief conversation on conventional topics the physician said:

"Why are you here?"

"Simply a difference of opinion," replied the patient. "I said all men were mad, and all men said I was mad—and the majority won."

and the majority won.

## The Unexpected

IRVING THOMAS

PETE came to us as an angel in disguise. It would have required a prophet to have foreseen his angelic qualities before they were actively exhibited, for when we first saw angenc quanties before the first saw tively exhibited, for when we first saw him they certainly were not in evidence. He was hitched to a Jewish peddler's wagon, and a more neglected, dilapidated, skinny and dejected looking mule I had never seen. He stood with head hanging and ears flopped down like those of a lop-eared rabbit, as though he lacked the strength to hold such enormous appendages in an upright enormous appendages in an upright position. They really seemed enormous in comparison with the rest of his body for in his best and fattest condition he never weighed more than eight hundred, and at that time he must have weighed a great deal less. He seemed to be nothing but a mule's hide stretched over a great deal less. He seemed to be nothing but a mule's hide stretched over a perfectly fleshless skeleton. The peddler explained that it was Pete's own fault that he was in such bad condition, and backed up his statement by calling attention to the fat, slick-coated mustang which made the other half of his team. It was his practice, he said, to camp wherever night overtook him and turn his team loose to graze by the roadside. If they behaved themselves this was all they needed, in addition to what they picked up along the fences while he bargained with his customers; but Pete could not be trusted, for he took advantage of the darkness of the night to conceal himself, so that at hitching time in the morning his owner was compelled to spend the forenoon hunting him instead of pursuing his business. He assured us, however, that if he had a fixed abode Pete would be a model mule, for outside of this habit of playing hide-and-seek with his that if he had a fixed abode Pete would be a model mule, for outside of this habit of playing hide-and-seek with his owner he was without a fault. With no feed but the grass which he could reach within the length of his tether from a single fence post he could scarcely be expected to stay in condition, but with the run of a feed lot or pasture he would soon be a very different mule. This excellent creature was offered to us for the small sum of twenty-five dollars, for the small sum of twenty-five dollars. for the small sum of twenty-five dollars, because, though this was far less than he was worth, his owner knew where he could buy another which could be trusted to graze on the road for that amount.

It happened that just at that time we were trying to decide between a windmill and a tread-power for running the pump churn grinding stone etc.

windmill and a tread-power for running the pump, churn, grinding stone, etc. The tread-power had an advantage over the windmill, in that it would always work whether the wind was blowing or not, and was movable; but the dog was not heavy enough to run it, and the horses were too heavy and too valuable to be put to such work. A twenty-five-dollar mule would be just the thing, provided he would work. A A twenty-five-dollar mule would be just the thing, provided he would work. A whiffletree could be attached to the tread-power and the mule could haul it about wherever it might be needed. We had misgivings as to Pete's willingness to work, but decided to risk the twenty-five dollars, as the plan seemed attractive, especially as our nearest neighbor, who had been so lucky as to get a windmill before we could afford it, had frequently been compelled to pump water for his stock by hand in the hottest weather of summer and on those still cold days of winter when the mercury hides itself in the bulb of the thermometer. thermometer.

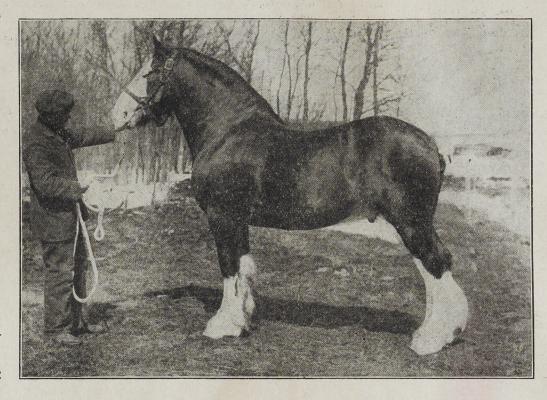

thermometer.

As standing in the stable with nothing to do would not be good for Pete we turned him loose in the barnyard, and threw him a few handfuls of oats and a forkful of hay at feeding time. He was not demonstrative and we were unable to determine whether or not he appreciated good treatment, but we appreciated good treatment, but we liked him in a passive way, because he so thoroughly minded his own business, all of us except Dick, our hired man.

## IMPORTED CLYDESDALE FILLIES AND STALLIONS

50 the very CHOICEST Have size and Quality

50 the very **CHOICEST** Have size Quality

These choice animals will be on Exhibition at Brandon during the Fair. Parties wanting a first class filly should see this lot before purchasing. Our prices are reasonable, when quality is considered.

#### W. J. McCALLUM BRANDON. MAN.

#### CALGARY SUMMER EXHIBITION

(Continued from page 1051)

The senior yearling class had only one entry in Lancaster Lad, owned by W. H. English. However, he was a very creditable animal, for the judge afterwards awarded him the champion-

w. H. English. However, he was a very creditable animal, for the judge afterwards awarded him the championship male prize.

The junior yearling class had a firm entry, both as to numbers and quality. Nine animals were in the ring. Chas. F. Lyall, of Strome, had the winner in Scotch Goods, a sappy roan lad. Jilt Lavender, owned by J. M. Bruce, another roan, was second. Weston Hero, also owned by Mr. Bruce, was third, while Jos. Caswell had the fourth animal in Spicy's Heir.

R. W. Caswell had the winning bull calf and also the reserve champion bull, in Augusta Star. This calf is a thick lad and should develop well. W. H. English had the second in Roan Marquis. Another good calf. J. Caswell owned the third calf in Spicy's Shadow, while Bryce Wright, of De Winton, claimed the fourth honors with Baron Ramsden. The Shorthorn females are well worthy of favorable comment. In each and every class was there found some fine animals. Ten entries filled the cow three years and over class, and on the whole they were an even bunch. The ringside talent had their favorites, and to a casual observer these appeared to be a number of animals that might creditably stand first. However, the judge selected Village Blossom, a three-year-old maiden that made her first appearance in a Western show-ring. She is a cow with much quality and smoothness, and was a good first. Her winning qualities were so impressive to the judge that he afterwards awarded her the female championship prize. Chas. F. Lyall, of Strome, was her owner.

Red Bessie 2nd, owned by W. H. English stood second. This female

Chas. F. Lyall, of Strome, was her owner.

Red Bessie 2nd, owned by W. H. English, stood second. This female also possesses much quality, although she has not the smoothness of her winning competitor, showing more prominence at the hooks. W. H. English also owned the third prize animal in Daisy Bell 3rd. R. W. Caswell came

fourth with Olive Wenlock 2nd, an im-

fourth with Olive Wenlock 2nd, an imported roan.

W. H. English headed the two-year-old heifer class with Poplar Park Queen 2nd, a heifer showing good fit and of a blocky type. R. W. Caswell had the second and third animal in Miss Belinda and Sylvan Star. Joseph Caswell came fourth with Bertie's Heroine.

There were eight entries for heifer senior yearling. Lady Empress 4th, a sweet roan exhibited by R. W. Caswell, got the winning ribbon. Poplar Park Bess, exhibited by English, stood second. R. W. Caswell came third with Sylvan Star 4th, and Bryce Wright fourth with Queen of the Roses.

The junior yearling class brought out some good ones. R. W. Caswell won first and second with a pair of excellent roans, Village Vanity and Vanity 13th. C. F. Lyall came third with Rosedale 2nd.

Red Queen owned by English proved.

roans, Village Vanity and Vanity 13th.
C. F. Lyall came third with Rosedale
2nd.

Red Queen, owned by English, proved
the winner in the heifer calf class. She
had eleven competitors, but she was a
good winner. Miss Nettie 11th, owned
by C. F. Lyall, a smooth red, came second. R. W. Caswell was second with
Sylvan Star, while Sunbeam C. 2nd,
exhibited by English, was fourth.
For Shorthorn herd bull and four
females, W. H. English secured the
honors with his line-up of reds.
In the class for three calves under one
year old, owned by one exhibitor, W.
H. English was first; R. W. Caswell
second, and C. F. Lyall third.

The prize offered for the winning
Alberta herd bull and three females,
was won by C. F. Lyall. Jas. Wilson
of Innisfail, secured second and Bryce
Wright third.

DAIRY CATTLE

There was a strong representation of call the deign knowledge received.

There was a strong representation of all the dairy breeds, many local breeders appearing, especially in the Holstein and Ayrshire classes. In the Holstein classes three noted breeders competed for the honors. W. J. Tregillus, of Calgary, and T. Laycock & Sons, of Calgary, are old-time exhibitors, and they were out with a strong string. Michener Bros., of Red

Deer, had a number of winners. They are but new exhibitors, but by the number of awards that came their way they are in the business to be heard from again. G. H. Hutton, of Lacombe, made the awards in all the dairy classes. The Holstein prize winners were: Bull, three years or over—1, W. J. Elliott, Strathmore; 2, W. J. Tregillus, Calgary, Crown Chief; 3, W. J. Tregillus, Peitge de Kol Butter Boy, Bull, two years—1, Isaac Bateman, Innisfail, Mercedes Houwtji; 2, Thos. AYRSHIRES.

The exhibit of Ayrshires was strong and some animals notable in the breed were on exhibition. A. H. Trimble, of Red Deer, an old-time breeder and exhibitor, was out with a classy bunch. His champion cow, White Rose of Spring Brook, showed in splendid form. She is one of the best of her breed found in any herd in Canada. J. Morrison Bruce, of Lashburn, Sask., exhibited a shipment of two carloads just shipped from the East.

Prizes as awarded, were:

a shipment of two carloads just shipped from the East.

Prizes as awarded, were:
Bull, three years or over—1, Barcheskie King's Own, J. Morrison Bruce, Lashburn, Sask.; 2, Stoney Croft King, J. E. McDonald, Calgary; 3, Barcheskie Scotch Lad, J. J. Richards, Red Deer. JERSEYS.

B. H. Bull & Sons, Brampton, Ontario, were the principal exhibitors of the Jersey breed. R. Munro, of Calgary, and W. J. Elliott, of Strathmore, also were competitors and this was with only one or two entries. The Brampton herd won practically all the prizes and the championship ribbons. This herd will appear at Winnipeg and Brandon exhibitions.

SHEEP.

Some fine porkers were on exhibition, representative of the various breeds. The Berkshire exhibits were worthy of special mention, especially in quality. The awards were as follows:

BERKSHIRES.

Boar, two years or over—1, Lew Hutchinson, Duhamel; 2, T. A. Cox, Brantford, Ont. Boar, one year and under two—1, Lew Hutchinson; 2, T. A. Cox. Boar, over six month under one work.

There was a stronger sheep exhibit than is usually seen at the Calgary exhibition. T. A. Cox, of Brantford, Ontario, had a strong entry and he was officially, had a strong entry and he was successful in capturing many of the most important prizes. Jas. McCaig, of Lethbridge, made the awards to the entire satisfaction of all concerned.

SHROPSHIRES.

## **GOVERNMENT FARMS**

INDIAN HEAD SASK.

Special excursion trains will be run from the following lines on the

Tuesday, July 26.
Arcola line points between Antler and Kronau.
Soo line points between Estevan and Pasqua.

Wednesday, July 27.
Wolseley-Reston line points between Maryfield and Wolseley.
Prince Albert line points between Saskatoon and Regina.

THURSDAY, JULY 28.
Outlook line points between Outlook and Moose Jaw.
C. P. R. main line points between Mortlach and Fleming.

#### PROGRAMME

The afternoon will be brimful of good things. Eminent agriculturists will be there—men who have a national reputation—and they will be the entertainers.

This is the Saskatchewan farmers' annual outing, and everything possible is being done to make it enjoyable. Good farms, good company, good speeches and good music should make a good time.

#### CHEAP FARES

Extremely low rates, which in many cases are much less than single fare for the round trip, are in force on the above lines. Inquire of your

Full particulars re programme, fares and train times are given in posters, which may be seen in stations and public places.

F. HEDLEY AULD,

Director of Agricultural Extension Work

College of Agriculture June 30, 1910

Tees. Flax—W. E. Tees, Tees.

#### DISTRICT EXHIBITS

DISTRICT EXHIBITS

The manufacturers and arts buildings were well filled with exhibits put up by the many manufacturing concerns. In the agricultural section much interest centered. Besides the acreyield competition there were the various exhibits from the different districts. At the Dominion fair a couple years ago, twenty-three districts had an exhibit, but this year it had dwindled down to six. However, those that did make the effort made a good one. The Cochrane exhibit won the first prize, winning by 216½ points. Their varied products were well displayed, showing what really was produced by the farmers of their community. Cook Bros. of Cochrane, managed the exhibit. The Cardston district won the second prize, and although it had to take second yet it was a creditable one. The displayed grasses and clovers was especial. yet it was a creditable one. The dis-play of grasses and clovers was especially notable. The display of grains but demonstrates the fertility of the Cards-

Carstairs won the third prize transfer of the third prize, for its exhibit was composed mostly of grains and grasses, they having 124 different varieties of native and tame grasses. Lloydminster won the fourth prize, and while their exhibit was choice

prize, and while their exhibit was choice still they did not have the quantity.

Salmon Arm had the only exhibit from British Columbia, and to the prairie farmer this display was most distinct. Fruits and vegetables of many and varied sorts were a notable attraction and the exhibit did credit to the district it represented it represented.

The poultry show and the canine exhibit was well represented, quite up to the standard of previous exhibitions. The department of agriculture had offices on the grounds, showing the work and experiments done by the various branches of the department. The Lacombe experimental farm had a good exhibit along similar lines. Charts were hung up, showing the results of

## THE NEW FLAVOR

A flavor used the same as solving granulated sugar in water and adding Maple-ine, a delicious syrup is made and a syrup better than maple. Mapleine is sold by grocers. If not send 50c. for 2 oz. bottle and recipe book. Crescent Mfg. Co., Seattle, Wn.

the various experiments in grain growing and livestock feeding.

As advertised the milking machine twice a day performed its work, milking some twenty cows, and this in itself proved to be a great attraction. Evidently the work it performed was quite satisfactory to hundreds who commented upon it. As it was seen the work was done efficiently and well, but its further use in a practical sphere will demonstrate whether or not it will be advantageous for an ordinary dairyman to place his confidence in it as a laborsaving machine.

The "Big steers," as they were called, were much wondered at. Three steers weighing respectively 3010, 2,970 and 2,700, owned by P. Burns, were on exhibition. The animals were five years

### GOSSIP

The first annual convention of the South Dakota Dry Farming Association is to be held at Rapid City, S. D., July 18 and 19.

#### **EDMONTON EXHIBITION**

By reference to the advertisement columns an announcement of the Edmonton Exhibition will be noticed. This exhibition, always one of the best in Western Canada, promises this year to be bigger than ever, celebrating, as it does, the opening of the new exhibition grounds, covering an area of 147 acres, and on which \$187,000 has been spent in the erection of modern stock buildings, race stables, show horse stables, sheep and hog sheds, grand stand, etc. The race track, a half mile standard track, has been completed, and has been pronounced by horse men who are working out their horses daily on it to be one of the fastest, if not the fastest, in Western Canada.

The main building will not be erected until next year the intention being to

be one of the fastest, if not the fastest, in Western Canada.

The main building will not be erected until next year, the intention being to devote the full strength of the exhibition association to the stock and race features of the exhibition. Over \$30,-000 will be distributed in prizes and purses, and stockmen, racemen, manufacturers of farm machinery and showmen will find the Edmonton exhibition well worthy of their patronage.

The grounds are served by the Canadian Northern, Grand Trunk Pacific and Canadian Pacific Railways, as well as by two lines of street railway. Arrangements have been made whereby stock may be billed direct to the exhibition grounds, where ample accommodation has been provided, stalls, straw for bedding and water being furnished without charge, also fodder at current market prices.

The attractions will be of more than

without charge, also fodder at current market prices.

The attractions will be of more than usual interest. Every day's race programme is a good one, and between heats a vaudeville performance will be given in front of the grand stand, in addition to daylight fireworks. The evening programme will include horse racing, vaudeville and a grand pyroracing, vaudeville and a grand pyrotechnic display. On the midway will be found the Al. G. Barnes' three-ring wild animal circus, besides numerous other interesting and fun-making side-

For anyone interested in the Canadian West in general, and the Edmonton district in particular, no better time of year could be desired to visit the same than the month of August to the same than the month of August to size up the country, its crops and its stock. A. G. Harrison is manager of the association and will be pleased to answer all enquiries and send a copy of the prize list on application.

#### PLEASED WITH JERSEY

The following letter to B. H. Bull & Son from Wm. Hartley, on June 18, shows how purchasers are satisfied with Brampton Jerseys:

"Kindly let me know per return mail if you can ship me a couple of heifer calves. Let me know your price. If a car is coming west shortly."

## General French And The Ross Rifle

The Canadian Courier of June 18th The Canadian Courier of June 18th states editorially in speaking of General French: "When a man so high in the British Army declares that the Ross Rifle is the equal if not the superior of any other small arm in the world—

"Comment is unnecessary."

If you are a Military Target shot d want a prize-winning rifle, buy "Ross" Mark III.

If you are a sportsman and want the best rifle for stopping any game, buy a "woss" Sporting Model. It has all the accuracy of the Military barrel, and is an excellently balanced arm. Prices from \$25.00 to \$70.00.

Write for Illustrated Catalogue.

## QUESTIONS

### ANSWERS

#### SUMMER PASTURE

What should I sow to give pasture for late summer? How would Hungarian grass do?—Reader, Man.

Ans.—If the land that you wish to sow to a pasture crop is fertile and well supplied with moisture you should get a good growth of Hungarian grass, but otherwise you would get more pasture by sowing to oats at the rate of three bushels per acre.

#### SPECIMEN OF ROOT

Enclosed you will find a specimen of root. Is it ginseng? If not, what is it, and of what commercial value is it?—Alberta Reader.

Ans.—Without having a complete plant and flower it is impossible to say definitely what plant this is from. It is not the ginseng root, however, but it might be one of some other of the medicinal plants. If you can get a whole plant, stem, leaf and flower, I can then easily know what it is and its economic value.

C. H. Lee.

SPAVINS

#### SPAVINS

SPAVINS

Twelve-year-old horse has a bone spavin on each hind leg. The spavins are old, probably from birth. Can anyone give a remedy to stop the lameness?—Subscriber.

Ans.—Firing and blistering, or cuneal tenotomy are the methods and operations usually resorted to for the cure of spavin. When these fail, a piece of a certain nerve may be resected out. In many cases the results are good. These operations can only be done by skilled veterinarians.

SUBACUTE LAMINITIS

#### SUBACUTE LAMINITIS

"Kindly let me know per return mail if you can ship me a couple of heifer calves. Let me know your price. If a car is coming west shortly you can wire me and make sight draft, or ship C.O. D. at Winnipeg stock yards. The calf I got from your Brampton Jersey herd has turned out a good cow. You have certainly got the stuff. We have several Jersey herds around Winnipeg, but nferior to yours."

CENTRIFUGAL PUMP

The American Well Works, Aurora, Ill., have just issued catalog No. 117, which describes among others the "American Centrifugal Pump," the greatest money-saver dependable under every condition. Has had forty-one years of manufacturing experience behind it. Took all the Yukon-Pacific Exposition prizes in 1909. Made in both horizontal and vertical types in any size. Our readers should note the announcement with beautiful illustration in our columns, and write for the catalog if interested to the general office and works.

SUBACUTE LAMINITIS

My horse started with what my local veterinary said was influenza. There were four days he did not eat or drink. No swelling; slight cough. After one month he seemed to be all right, and started to work him of crowled in out stand it, so laid him off. He has done nothing since. Fed I gallon bran and oasts three times a day, and let him out a little every day it was fit. He did not eat much hay, although teeth are in good shape. He seemed to have recovered, and was in the pink of condition and just as active as ever, until two weeks ago, after starting to work him again one half day, he had colic pains for three or four hours at night. Two days later I turned him out, and he was stiff in all his limbs; could scarcely move; stiffness partly left him, but he still moves with a slow, rather unsteady gait, and is losing a little flesh. Does not eat or drink amount all now, although before this atlack he was a very active horse.—T. R.

MANITOBA GYPSUM COMPANY, LTD

WINNIPEG, MAN.

Ans.—Your horse had an attack of "laminitis," inflammation of the sensitive structures of the feet, usually called founder. This trouble will frequently follow attacks of indigestion and colic. This has been going on for some time now, and the case has become sub-acute, or chronic. Have the shoes taken off, and the feet pared down to their proper size and shape, then shoe him with flat shoes and leathers, with tar and oakum packing on front feet. Then clip off the hair around the coronets of both front feet, from the hoofs to the fetlocks, and well rub in for 20 minutes each foot the following blister: Powdered cantharides, 4 drams; biniodide of mercury, 4 drams; vaseline, 4 ounces. Mix well. Now, tie his head up for twelve hours; then wash off the blister with warm water and soap, and smear with vaseline every three days. Now, exercise him, or turn him out. It may be necessary to repeat the blistering in two weeks. or turn him out. It may be necessary to repeat the blistering in two weeks

#### WARTS ON COW'S TEATS

I have a cow whose teats are covered with warts, which peel off more or less in milking. They seem to disappear in the winter, and come on again about the middle of June. They grow quite long, which makes the milking harder.—
H. C.

Ans.—Cut off with a sharp pair of scissors all the warts that have a neck sufficiently long to allow the scissors between them and the teat, Have a piece of nitrate of silver ready to cauterize the bleeding surface immediately the wart is cut off. Do not cut off too many at one time, as the teat would become too sore to milk. It is better to wait until healing has taken place before cutting off more. Those with a wide base may be also cauterized with the nitrate of silver once a day. To facilitate milking, a large rubber finger cot, or a similar article, may be put on the teat. This would prevent the irritation of the fingers. All animals, including man, are liable to be affected with warts, but they usually die out and disappear in time. Ans.—Cut off with a sharp pair of

#### HORSE HAS INDIGESTION WITH COLIC

Horse Has indicestion with colic

Horse, eight years old, has a sick spell about every two or three weeks. He lies down and rolls, and seems to be in great pain; has difficulty in making his water; spreads himself out, but fails to make any water. I have been giving him one tablespoonful of sweet spirits of nitre, which gives him relief in about one-half hour, but I am told that giving him so much nitre and so often is bad for the kidneys. What treatment would you advise in this case? This horse in every other way is in splendid condition. I fed my horses fodder corn once a day during the winter, and am told that it is hard on the kidneys. Is that the case? G. J. Ans.—Your horse suffers from periodic attacks of indigestion. The probable cause was the fodder corn fed during the winter. We presume you are not feeding it at the present time, consequently we would expect the attacks to be less frequent. A run on grass would bring about good results, as the digestive system would be benefited by the change and rest. Corn stalks when fully matured contain considerable woody fibre, which, when eaten, will produce indigestion in some horses, but has no direct irritating effect on the kidneys. Sweet spirits of nitre, like all other drugs, is a very good medicine when used judiciously. It should not be resorted to and used indiscriminately. A safe dose for an average sized horse is from 1 to 2 fluid ounces (2 to 4 tablespoonsful) given every two to six hours, in a pint of cold water as a drench. Several doses may be given, but should be dis-I to 2 fluid ounces (2 to 4 tablespoonsful) given every two to six hours, in a pint of cold water as a drench. Several doses may be given, but should be discontinued when the desired results are obtained. If not convenient to turn the horse on pasture, we advise preparing him for physic by feeding bran mashes only for twelve hours; then give a ball composed of from 8 to 10 drams of aloes (according to size of the horse), 1 dram of calomel, 1 dram of powdered ginger, soft soap, enough to combine the ingredients; roll up in soft paper, and administer. Continue to feed bran mashes (no hay or grain) until he commences to purge; then give one-half his usual allowance, increasing the amount as purging ceases.

## TRADE NOTES

CALGARY'S NEW SASH AND DOOR FACTORY

FACTORY

The Riverside Lumber Company, Ltd., of Calgary, now one of the largest lumber concerns doing business in Western Canada, have added to their business a sash and door factory. This is located at Calgary, where the head office is found and from there the number of branch offices operated by the company are supplied with material. A glance at their advertisement in a recent issue indicates where those various offices are located.

Many question the fact how it is that

Many question the fact how it is that the Riverside Lumber Company established but five years ago with comparatively small capital, has developed into such an important concern. To complete the answer it is but necessary to visit the plant at Calgary, and a chat with the manager will convince you of the fact that it is the man at the helm to whom this success must be attributed. to whom this success must be attributed. Alexander Sereth, the manager, belongs to a generation of lumbermen. His parents and grand parents were dealers in logs and boards in the Old Land. It was there Mr. Sereth received his early training. He was three years in the lumber business in the United States, and now as the manager of this concern.

the lumber business in the United States, and now as the manager of this concern his gifted powers and his experience has brought success to the firm.

The Calgary plant employs over one hundred and twenty men. The firm own their own timber limits in British Columbia, a brother of Mr. Sereth looking after the rough lumber supply in that province. Thus it is that the firm can have a constant supply of lumber and retail it at a uniform price. They guarantee all material sent out of their factory and farmers and builders would do well to consult this firm before placing orders for building material.

#### A PHYSICIAN'S TESTIMONY

Dr. Snow, late senior surgeon Cancer

Hospital, London, England, said:
"Scientific nutrition like Bovril
will do more to stay the ravages of
any malady than a century of progress
in drug treatment."

Well fortified by nourishing food you can resist insidious or sudden attacks of disease. Bovril is a highly concentrated food. Immediately it is taken it is transformed into energy and strength. No other food so quickly stimulates and invigorates the system as Bovril

#### H B K COMPANY

A representative of this paper had the pleasure of calling upon Mr. J. J. Westgate, president of the Hudson Bay Knitting Co., of Montreal, and of being shown over this company's immense factories.

This concern was founded by Mr. This concern was founded by Mr. Westgate some twenty years ago, and has steadily increased its business until today it is without doubt the largest of its kind in Canada. Some idea of the magnitude of this business can be realized by the floor space used, solely for manufacturing purposes of 112,000 square feet.

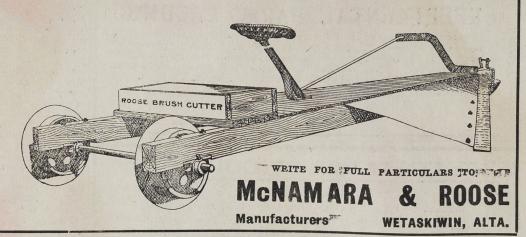

It has always been the rule of this company to put the best quality of material obtainable into each and every article they manufacture, their motto being: "Never sacrifice quality for price." It may be here stated, however, that in many instances they sacrifice price for quality. Any business with quality as its foundation is bound to succeed.

Once more to the front, they are now making the H. B. K. patent "Ripless Tip Glove," which positively cannot rip, thus coming nearer being an everlasting glove than any other glove ever made or thought of.

Some two years ago they commenced manufacturing the "Husky" workingman's shirt, which has now become famous, every pair being guaranteed to wear twelve months, something unheard of before. Any glove or garment bearing the trade mark, H. B. K. in the red diamond is guaranteed and can therefore be relied upon.

## THE IMPROVED ROSE BRUSH CUTTER

A solid steel machine. easily worked with four horses. Takes the place of thirty men cutting by hand. Will clear from five acres a day up. Get the brush off your land. It is no good for any purpose and it's hard to sell brushy land.

## \$3,000,000 Spent To Make a \$1,000 Car

Over \$3,000,000 has been invested to make Overland cars cost less than any others. The saving all goes to our buyers

We are making a 25-horsepower Overland for \$1,000 this year. It has a 102-inch wheel base—a possible speed of 50 miles an hour. There is not a road in America—not a hill with a road up it—which this car cannot travel.

We are making a 40-horsepower Overland, with single rumble seat, for \$1,250. It has a 112-inch wheel base. Every price which we quote includes five lamps and magneto.

As a result of these values of the lambs and the statement of these values of these values of these values.

As a result of these values, Overlands have become the most popular cars in existence. Over 20,000 people will buy them this year. Let us explain how we give such remarkable cars for the money.

#### Automatic Machinery

We have spent some hundreds of thousands of dollars on special automatic machinery. Each machine is de-vised to make some part in the most economical, most

Here is a machine which enables one man to do the work of sixty men. Here is a machine which performs thirty operations in the time which another machine took

Here is a welding machine which brings steel to white heat while one is taking a breath. Here are rows upon rows of automatic machines doing work of an army of experts far better than experts ever did it by hand. The sum of their savings—on the thousands of parts which go into a car—saves hundreds of dollars on an automobile.

#### Other Economies

## One whole factory—every machine and every man in it—is devoted to one model alone. There are separate factories for the different parts, so that all can be made in the most economical way. Then we have an output of \$24,000,000 per year. So the overhead expense—which in some cars amounts to a fourth of the cost—is but a trifle per car in the Overland. Those are some of the reasons why no other car can compete with the Overland. M 33 The Willys-Overland Co. TOLEDO, OHIO Licensed Under Seldon Patent Please send me the catalog M. 33 free. Werland,

#### Utter Simplicity

Yet the man who knows would give more for the Overland than for any other car in its class. It is so simple, so easy to care for, so trouble-proof, that it appeals to experts and novices.

The Overland has fewer parts than any other automobile. All the complexities have been eliminated. The car almost cares for itself.

Many owners write of running it thousands of miles without even cleaning a spark plug.

The operation of the car is by pedal control. One goes forward or backward, fast or slow, by simply pushing pedals. A child can master the car in ten minutes. A young woman is now running one of the cars from the

ing pedals. A child can master the car in ten minutes. A young woman is now running one of the cars from the Atlantic to the Pacific.

Overlands are used in the U. S. Mail service because of their proved reliability. Each car does the work of three horse-drawn vehicles.

Numerous large concerns supply Overlands to their country salesmen, because any man can always keep them going.

going.

them going.
On a ranch in Texas, 15 men in Overlands are doing the work of 50 men on horses.

#### Ask for the Facts

More people are buying Overlands now than any other car in the world. You should know all the reasons, for those reasons will appeal to you. If you will send us this coupon we will mail you a beautiful catalog, giving all the facts and picturing all the styles. Please cut out the coupon—now—before you forget it. Learn the facts about this remarkable car.

We have dealers in 800 towns.

The 40-horsepower Overland costs from \$1,250 to \$1,500, according to style of body, etc. The wheel base is 112 inches. All prices include gas lamps and magneto.

## **EXCURSIONS**

#### LIGHTNING RODS NECESSARY

Following is the endorsement of properly installed lightning rods, given by the Central National Fire Insurance Co. of Chicago

believe "We believe that lightning rods properly installed effectively protect buildings against lightning, and where a property owner has so protected his property he should be entitled to a reduction in rate. While there are many firms manufacturing lightning rods and putting them up, yet so much depends upon the manner in which they are erected that we do not believe it would be proper to make a general reduction of rate regardless of that lightning rods

not believe it would be proper to make a general reduction of rate regardless of whose rods were used.

"Having gone into the matter by way of investigation, we have decided to make a reduction of 20 per cent. from the regular fire and lightning rate where buildings are rodded with Dodd & Struthers' rods and system, manufactured at Des Moines, Iowa, this firm having studied the subject thoroughly, and taking such pains and care in the erecting of their rods that we give them this endorsement in the way of a reduction in rate."

duction in rate."

The prejudice against lightning rods is fast disappearing as their value becomes better known.

The prejudice that does remain and always will, is against those numerous ignorant and unscrupulous concerns which endeavor to make the sale of lightning rods an end towards filling their own pockets regardless of the ultimate protection received by the purchaser.

The president of one of the largest insurance companies recently said: "The great work accomplished by Dodd & Struthers is little short of marvellous. By installing their rods, they are abolishing all loss by lightning. Our fire losses are reduced 75 per cent."

Many insurance companies now grant a reduction of 10 to 33½ per cent. in insurance rates when buildings are rodded by D. & S. woven copper cable lightning rods.

A list of companies making these large reductions and other information can be had by sending a request to Dodd & Struthers, Des Moines, Iowa. The president of one of the largest in-

## SMALL FRUITS ON BRITISH COL-UMBIA COAST

EDITOR FARMER'S ADVOCATE

Now that, owing to the rise in land values, farms near Victoria are being cut up into ten-acre plots, a few words on the practical growing of small fruits may be of value.

may be of value.

Strawberries are grown either in hills, three feet apart, and cultivated both ways, or in matted rows three feet apart. The first produces the largest berries, and the second good-sized berries and the heavier crop per acre, but takes a little more hand labor to keep them clean. The best tool to keep them free from weeds is a one-horse keep them clean. The best tool to keep them free from weeds is a one-horse narrow (one inch) tooth cultivator, which can advantageously be used every week or ten days until the strawberries come into bloom, when the rows or plants should be mulched with short litter free from seeds, such as lawn clippings or chopped straw.

If plants are set in the fall they may be allowed to hear a light case and

clippings or chopped straw.

If plants are set in the fall they may be allowed to bear a light crop next season. If in the spring, no flowers should be allowed to develop, and at all times runners should be removed. After the season's crop of fruit is gathered the leaves should be cut off with a scythe, and, with some of the mulch, be burned off on the top of the rows, thereby destroying fungous diseases and insect pests.

The best manure to use is well-rotted stable manure, in which the vitality of weed seeds has been destroyed, which manure, before rotting, should be composited with one-third or one-fourth its weight of fish, and half its bulk of

## Sore, Chafed, Aching Feet.

Made Well and Comfortable by the Soothing Effects of DR. CHASE'S OINTMENT.

What misery many endure from sore, chafed and aching feet.

Tightly imprisoned in the modern shoe the feet perspire and the skin is chafed and irritated until it is in anything but a healthful condition. Possibly you never thought of Dr. Chase's Ointment in this connection, but it brings wonderful relief and comfort almost instantly.

Powders are often worse than useless, because they clog the pores of the skin and prevent healthful skin action.

Dr. Chase's Ointment is so healing and soothing that it takes out the itch-

and soothing that it takes out the itching, burning, stinging sensations and makes walking a pleasure.

It keeps the skin soft and pliable and prevents the formation of corns and

bunions.

bunions.

The better you become acquainted with Dr. Chase's Ointment the more you will marvel at the scores of ways in which it can be used wherever there is itching of the skin or a sore or wound that refuses to heal.

For chafing, skin irritation, ivy poison, stings of insects, barbers' itch, chilblains, eczema and itching piles, Dr. Chase's Ointment is the standard cure.

Try it when occasion arises and you will wonder how you ever got along without this great skin treatment. It is clean, pure and pleasant to use. It brings relief quickly and is almost magical as a healer of raw, inflamed skin.

Do not be satisfied with a substitute. If your dealer does not keep Dr. Chase's Ointment write for a free sample box to Edmanson, Bates & Co., Toronto.

to Edmanson, Bates & Co., Toronto.

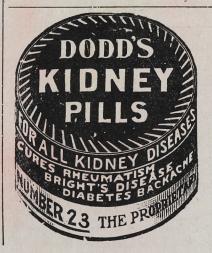

swamp muck. Kainit, one cwt. to the ton of fresh manure, or if this is not obtainable land plaster (but never lime) should be added to save nitrogen, and to avoid bad smells, a covering of soil should be given to the compost heap.

The strawberry bed should last four years profitably, if properly looked after, and weeds do not get too troublesome, and if the soil is in good condition at starting, i.e., in good condition for corn or potatoes. One application, the second year, of this manure compost should be enough, if, in the intermediate years a dressing of fertilizer be given.

Raspberries also need rich soil, and should be set, for small acreages, in rows six or seven feet apart, and three to three and one-half feet in the rows. A rich, moderately stiff loam suits these. They like constant cultivation, and the same manure as for strawberries. In fact this compost is perfect for all small fruits; it should be worked in as soon as spread, when the bad smell soon goes off. Raspberries are, in my opinion, best trained in arches, from plant to plant, as they are very quickly picked if thus trained, a great economy. They are also kept apart from the young growth. With us, with this fertilizer, raspberry canes grow ten feet long.

Logan berries should be set eight feet apart each way. Three cedar posts, seven feet above ground, should be set by each plant, one close by the root, and the others in line with the row, each two feet distant from this one post, one each side of it. The current year's

and the others in line with the row, each two feet distant from this one post, one each side of it. The current year's

Brandon Implement and Mfg. Co., Ltd. General agents, Dept. 35, Brandon, Man. leaving the centre one tree for the young growth again. Loganberries grow to great length, but are best cut off at about seven feet high, as the berries are larger and easier picked; economy of labor is always profitable.

Blackberries, if ordinary size, may be treated as raspberries; but, if rampant growing, like the evergreen or mammoth, may be treated as loganberries.

W. I. L. HAMILTON.

#### HEDGES FOR THE PRAIRIE

At the convention of the Western Horticultural Society, Prof. S. A. Bedford gave a very interesting talk on hedges for the country and city. A lively discussion followed. Professor Bedford's address as given in the annual report is as follows:

report is as follows:

Hedges can generally be classed under two heads, the low hedge for ornament, and the tall one for a windbreak. The former is adapted to city uses, the latter gives the best satisfaction on the

ter gives the best satisfaction on the farm.

Whether the hedge be high or low, care should be taken to select the right tree or shrub for the purpose, as some plants do not readily adapt themselves to the requirements of a hedge.

Stately trees like the elm are not naturally hedge plants, while low-growing and shrubby trees like the Ash Leaf Maple readily take the shape required for a hedge.

urally hedge plants, while low-growing and shrubby trees like the Ash Leaf Maple readily take the shape required for a hedge.

For the best results a hedge plant should stand pruning and naturally branch close to the ground, otherwise the hedge will look thin and bare. Trees with coarse open branches such as the Poplars or Cottonwoods, are unsuitable for this purpose, and no amount of pruning will make them attractive.

For the city or town a hedge can with advantage be planted on each side of a walk or driveway leading to the residence. For this purpose low-growing, fine-sprayed plants should be used as a coarse hedge would obstruct the view, and look out of place, the native Snowberry, with its tiny berry blossom in summer and pretty white fruit in the fall, is excellent for the smallest-sized hedges, as it takes kindly to pruning and can be kept down to one or two feet in height. The native Spirea found all over the prairie is another excellent plant for this purpose; it makes a hedge a little taller than the former one, and is covered with showy flowers in early summer; it stands pruning well, and there is no difficulty in getting it to thicken out at the base. It is suitable for a hedge from three to four feet high and is well adapted for planting beside wide walks or narrow roads leading to a residence.

In the city a hedge is often required for the purpose of a dividing line between two neighboring houses, where a fence would look unsightly; for this purpose it should be somewhat taller than the other two hedges I have mentioned, but still neat and compact. Nothing is better for this than Purple Lilac; it stands pruning well, if a somewhat low hedge is required, and blooms freely if left unpruned. The foliage is a bright green right up to severe frosts, but pruning must be frequent if a shapely hedge is required.

For the purpose of a screen between the front and rear of a house nothing is better than Caragana, if properly pruned, but this shrub is difficult to train unless taken very young, and it

For the purpose of a screen between the front and rear of a house nothing is better than Caragana, if properly pruned, but this shrub is difficult to train unless taken very young, and it should be planted in the hedge row when one year old and cut back severely at once; it will then start to branch close to the ground and make a very handsome hedge. Its soft silver foliage and bright yellow blossom make this a very attractive hedge plant.

To serve the purpose of a fence parallel with the sidewalk Caragana, Lilac, or Wild Rose can be used, the latter requires very frequent pruning, otherwise it will quickly become unsightly. For foliage effect our native Red Willow (Cornus) is excellent, it grows readily from cuttings and is a bright red color even in winter. For a contrast our native Buffalo Berry is excellent. The foliage of this plant is a bright silver color and its small fruit nearly covers the branches in the autumn.

On the average prairie farm shelter is very necessary, in fact until our

fierce winds are somewhat checked by trees in one shape or another, it is almost impossible to have a good vegetable or flower garden on the farm, and in winter the barnyards are so and in winter the barnyards are so filled with snowdrifts that it is difficult to move around and any article left outside is soon buried under several feet of snow

filled with snowdrifts that it is difficult to move around and any article left outside is soon buried under several feet of snow.

While a windbreak made of several rows of trees does good service for this purpose, a good many trees are required and the snow is very apt to break them down. In my opinion, a cheaper and better windbreak can be formed by planting the trees in the shape of a hedge; for this purpose it is best to have two hedges, the outer one 100 feet from the buildings; this should be made of willows, either sharp-leaved or Russian Golden. Willow will bend when loaded with snow whilst most other trees will break. This tree can be grown from cuttings and makes a rapid and cheap hedge. When planting leave only one bud out of the ground, otherwise they will dry out and fail to grow. The trees should be about two feet apart, and a single row is as good as a double one. After the first year very little pruning will be required for this kind of a hedge.

Inside of the willow hedge, and about 25 feet distant from it a row of seedling Maples should be planted; they can be set out from two to three feet apart and in a single row. A slight pruning should be given this hedge each year until it gets beyond reach, when it will do well without pruning.

In the twenty-five feet of space between the two hedges small fruits, such as raspberries, can be planted and abundant crops of excellent fruit obtained every year; the hedges provide shelter and the high banks of snow that always gathers there furnish moisture that lasts all through the fruiting season.

There are a number of other trees suitable for farm hedges, but I think these two are the best for the purpose

that lasts all through the fruiting season.

There are a number of other trees suitable for farm hedges, but I think these two are the best for the purpose and both are cheap and easily procured.

Mr. Stevenson.—With reference to the hedges, there is no doubt that a man needs a considerable amount of courage, as it requires to be pruned. The average man wants his hedge to grow quickly and does not prune enough, and very often he regrets it afterwards. Prune the first year's growth. In pruning shelter belt trees, some people will start in with the knife, and slash off branches. They have an idea that they should prune. Even if the cultivation must go they will prune, and oftentimes will cut down what should not be cut down.

Mr. Bedford.—We had a Maple hedge

Mr. Bedford.—We had a Maple hedge at Brandon, and we cut it right down level to the ground and we let it grow again, and it is one of the best we have now. Spruce is a very satisfactory badge.

Mr. Scott.-What about the Tartarian

Mr. Scott.—What about the Tartarian Honeysuckle?
Mr. Bedford.—Not very satisfactory while I was there. Willow is very good for the purpose.

Mr. Stevenson.—It is a very subject and leads to a great deal of discussion. Ginnalian Maple does all right on our place. Also the Buffalo Berry does well and is very hardy. I have seen it north of Moose Jaw.

have seen it north of Moose Jaw.

Mr. Bedford.—The Buffalo Berry is found more frequently along the Souris River. White Spruce from the uplands stands pruning all right. But I think it is better without pruning. I would take the ordinary sickle and trim the ends of the new growth of the Maple twice a year—in June and July. For city or town you should prune very frequently. Not so often in the country. For my own part I would not prune spruce. I would cultivate the soil a great deal. soil a great deal.

Question.—Is the Hawthorn a desirable hedge?

Mr. Bedford.—Not a rapid grower, but it is good for hedge purposes.

Question.—I find Spruce die in the soil being planted too deeply.

Answer.—It depends upon the locality where you are as to how deep you may plant them and expect them to live. Do not plant them deep around Winnipeg. You can always distinguish between the black and white spruce. Do not take the black spruce. It is not as nice a tree, as it is inclined to die out around the bottoms. The black has a darker foliage; but not as dense a top.

## DR. WOOD'S NORWAY PINE SYRUP.

Is Specially Calculated To Cure All Dia eases of the Throat and Lungs.

Coughs, Colds, Bronchitis, Sore Throat, Hoarseness, Croup, Pain or Tightness in the Chest; and all Bronchial Troubles yield quickly to the curative powers of this prince of pectoral remedies. Is contains all the virtues of the world famous Norway pine tree, combined with Wild Cherry Bark, and the soothing, healing and expectorant properties of other excellent herbs and barks.

Mrs. John Pelch,
Windsor, Ontario,
Writes:—"I was
troubled with a nasty hacking cough
Cured. for the past six
months and used a
lot of different remedies but they
did me nc good. At last I was advised
by a friend to try Dr. Wood's Norway
Pine Syrup and with the first few doses
I found great relief and to-day my hacking cough has entirely disappeared and
I am never without Dr. Wood's Norway
Pine Syrup in the house."

The price of Dr. Wood's Norway Pine Syrup is 25 cents per bottle. It is put up in a yellow wrapper, three pine trees the trade mark, so be sure and accept none of the many substitutes of the original "Norway Pine Syrup."

Money sent by Telegraph and Cable

Issued in all Stations of the Canadian Pacific Railway Co.

Take care of the flock during the summer months. As with all other animals neglect at any season gives depreciated returns. If it is possible to give fowls wide range, very little feed may be required. In case it is necessary to have them closed in arrange to let them out regularly for a run about sundown. A little watchfulness will ensure the return of all to the pen.

People who use an incubator, say the authorities of the Minnesota Experiment Station, should not remove chicks from the machine until they are thoroughly dry. Colds at this time are likely to result in pneumonia and death. The brooder should be heated to ninety or a hundred degrees before the chicks are placed in it, and kept at about that temperature for a week, at least, when the temperature may be gradually lowered to a degree that barely renders comfort.

## MONEY IN POULTRY WELL MANAGED

"We should give to the poultry crop the same attention we give to any other crop. Get proper appliances, and the chickens will come along all right, in spite of a few days' rain. I have," said Prof. F. C. Elford, addressing one of the co-operative egg circles in Peterborough county, Ontario, "seen people buy an incubator, but no brooder, or put 100 chicks in a 25 brooder.

"Near Macdonald College is a lady who gets a gross annual return of \$300 from 40 hens. She gets the best price going because her eggs are good. She sells her flock of hens off once a year, and takes pride in having a nice, uniform flock."

and takes pride in having a nice, uniform flock."

Prof. Elford pictured an old-fashioned situation up in his native county of Huron, where the farmer's wife had to rummage a considerable part of a mile through a struggling row of ramshackle buildings to feed the hens. It took her as long to do this chore as to get the dinner. Result: Those chickens were fed about once a day, somewhere around ten o'clock. It was a common mongrel flock, and the returns—well, imagine! To-day, on that same farm is one of the best poultry-houses in the country, located close to the dwelling; only one breed is kept, and everything is up to the mark. Last year, \$1,500 worth of poultry produce was sold from that farm.

"Have things convenient, with the grain handy in barrels. From time to time have the hired man put a few bags of grain in the barrels are filled, and charge it up to the hens. It takes about two minutes to clean out a henhouse, if done regularly. I stated that once in a meeting, and a lady replied

house, if done regularly. I stated that once in a meeting, and a lady replied that it took twelve months to get theirs

cleaned.

"It is astonishing what a proportion of bad eggs get into commercial channels. Here is one way it happens. I have a poultry plant in Ontario, and an honest man in charge of it. He sent shipment of 30 dozen eggs to Montreal. I went in to the consignee to see how they had turned out. The candler looked up his report, and found that 18 dozen were first-class, 10 dozen stale, and two dozen rotten. Upon investigation, it turned out that my man had lacked several dozens to fill out a case, and accepted the offer of some from a couple of neighbors. They had conscientiously put the eggs, when gathered, in a nice basket behind the stove. The results were due, not to dishonesty, but to ignorance.

The results were due, not to dishonesty, but to ignorance.

"I don't believe there has ever been such a demand for eggs as now. Prices have gone from 9 to 15 cents a dozen, and then on up, up, up. But consumers want the quality, and as soon as the article they want is produced in quantities, we can get the price."

Our Telephones are extensively used in Canada, England, France and by the U.S. Government.

Our great illustrated book on the Telephone sent Free to anyone writing us about any new Telephone lines or systems being talked of or organized.

We have a splendid money-making proposition for good agents.

The Dominion Telephone Mfg Co., Ltd. Dept. Q, Waterford, Ont., Canada.

## This Man Is Young at 55 Years

He is a "Health Belt Man," Therefore Has the Vitality and Hot Red Blood of Youth in His Veins; He Towers like a Giant Above the Ordinary Difficulties of Life—Be a "Health Belt Man" Yourself— It Gives Manly Strength; It makes You Young and Keeps
You Young All the Days of Your Life; It Takes all the Coward
Out of Your Make-up—Let Me Give You of
This Abundant Vitality. Then Nothing Can Ever
Conquer You but Death Itself—100,000 Men
Have Taken My Advice. Why Not You?

The secret of lifelong youth may be summed up in one word—Vitality. If you have this great natural you have this great natural power in abundance years count for nothing. I use no drugs, I recommend none. Just the Health Belt. No privations, no dieting and no restrictions, excepting that all dissipation must cease. Put the Health Belt on nights when you go to bed; let it send its power into your nerves, organs and blood while you you go to bed; let it send its power into your nerves, organs and blood while you are sleeping. It gives you a great flow of soft, gentle, galvanovital electricity during the entire night. One application and you are like a new being; it takes all the pain and weakness out of your back; it makes you answer the morning greeting with "I'm feeling fine!" It is a great strength builder; it overcomes the results of earlier mistakes and indiscretions, it gives you a compelling power, so that you are attractive to all women and men with whom you come in contact. W. B. Freel, East End, Sask., writes: "I gourage me now."

This is one among tens o

"I am a man again, thanks to you. Nothing can discourage me now."
This is one among tens of thousands.

### Free Until Cured

Call or write to me and I will at once arrange to let you have the Belt on trial, not to be paid for until cured. No deposit or advance payment. Send it back if it doesn't do the work. Liberal discount for cash if you prefer to deal that way.

#### Let Me Send You These Two Books FREE

They fully describe my Health Belt, and contain much valuable information. One is called "Health in Nature," and deals with various ailments common to both men and women, such as rheumatism, kidney, liver, stomach, bladder disorders etc. The other, "Strength the Glory, of Man," is a private treatise for men only. Both sent upon application, free, sealed, by mail.

Dr. C. F. Sanden, 140 Yonge St., Toronto, Ont.

Dear Sir :-Please forward me your books as advertised, free.

### Put Your Feet in a Pair at Our Risk! MEGINE

Will Surprise and Delight You With Their Lightness, Neatness and Comfort Their Almost Unbelievable Durability

We want you to slip your feet into a pair of Steel Shoes—to FEEL and SEE and KNOW how much LIGHTER, NEATER, STRONGER, more COMFORTABLE they are than any other work shoes in existence. Hence we are making this special FREE EXAMINATION OFFER, merely asking a deposit of the price, while you are "sizing up" the shoes. If they fail to convince you IMMEDIATELY you can notify us to send for them at our expense and we will refund your money.

MUST SELL THEMSELVES

We ask no favors for Steel Shoes. Compare
them with the best all-leather work shoes you can
find. Give them the most rigid inspection inside
and out. Let them tell their own story. It's no
sale unless, of your own accord, you decide
that you must have them.

Better than the Best All-Leather Work Shoes

Steel shoes are the strongest and easiest working shoes made.

There's more good wear in one pair of Steel Shoes than in three to six pairs of the best all-leather work shoes. The leather is waterproof. The Steel Soles are wear-proof and rust-resisting.

The Steel Soles are wear-proof and rust-resisting.

They are lighter than all-leather work shoes.

Need no breaking in. Comfortable from the first moment you put them on.

Impossible to get out of shape. They keep the feet dry. They retain their flexibility in spite of mud, slush or water. They cure corns and bunions, prevent colds and rheumatism—save doctors' bills and medicines.

Thousands of Farmers Shout Their Praises

The enthusiasm of users knows no bounds. People can't say enough for their comfort, economy, lightness and astonishing durability. The introduction of Steel Shoes in a neighborhood always arouses such interest that an avalanche of orders follows.

Here is the way Steel Shoes are made: The uppers are made of a superior quality of leather, as waterproof as leather can be tanned. Wonderfully soft and pliable—never gets stiff. The soles and sides are made out of one piece of special light, thin, springy, rust-resisting Steel. Soles and heels are studded with adjustable Steel Rivets, which prevent the bottoms from wearing out. Rivets easily replaced when partly worn. 50 extra rivets cost only 30 cents and should keep the shoes in good repair for at least two years! No other repairs ever needed! The uppers are tightly joined to the steel by small rivets of rust-resisting metal, so that no water can get between.

The soles are lined with soft springy, comfortable Hair Cushions which absorb perspiration and oddres and olds.

rivets of rust-resisting metal, so that no water can get between.

The soles are lined with soft springy, com-fortable Hair Cushions which absorb perspira-tion and odors and add to ease of walking. 47

## Sizes 5 to 12. Black or Tan Color.

6, 9, 12 and 16 Inches High Steel Shoes, 6 inches high, \$2.50 per pair. Steel Shoes, 6 inches high, better grade of leather, \$3.00 per pair.

Steel Shoes, 6 inches high, extra grade of leather, ack or tan color, \$3.50 per pair.
Steel Shoes, 9 inches high, \$4.00 per pair.

Steel Shoes, 9 inches high, extra grade of leather, black or tan color, \$5.00 per pair.

OUR THREE CREAT FACTORIES in Racine, Toronto and Northampton, England, Almost Overwhelmed by the World-wide Demand

Good for the Feet! Good for the Health! Good for the Bank Account!

Those shoes are better for the feet, better for the health, better for the pocketbook than heavy work shoes or rubber boots.

#### MANAGING THE SUMMER HEN

EDITOR FARMER'S ADVOCATE:

Editor Farmer's Advocate:

Of course there is a flock of hens and a poultry house to begin with. Cull out all useless hens and fit them for market or the table; remove all cocks and cockerels. If required for breeding another season, house them by themselves away from the laying flock, and take care of them as prescribed for the hens. Lice! Wage war to the death of all lice for they breed very rapidly during summer and especially so when fowl are confined. The hens should be individually dusted with some good insect powder once a week. Whatever method is used for destroying lice be sure that they are destroyed.

Clean out the house. Scrub every

Clean out the house. Scrub every nest, perch, dropping board walls and ceiling with saturated lime water or thin lime whitewash, and keep everything clean and spray or wash with limed water once a month. Take out the glass windows and cover the openings with cotton.

Make the yard as large as the premises will permit. If there is plenty of room allow fifteen square feet of ground space to each hen. Fence with wire netting to the desired height. Make a box twelve to eighteen inches high and as large as will accommodate a large percentage of the hens at a time. Keep this box two-thirds full of clean chaff or cut straw. Make a second box same height but not so large and thirds full of clean and thirds full of clean and thirds full of clean and the strain of the second box same height but not so large and the second box same height but not so large and the second box same height but not so large and the second box same height but not so large and the second box same height but not so large and the second box same height but not so large and the second box same the second box same height but not so large and the second box same height but not so lar height but not so lare thirds full of clean, a third box as large ep as box girds full number one and of clean, fine, d which put a quoccasionally. powder h box box ber two, for ashes charcoal. unulated tents are pl

or some oth or some oth Also cut bon tities of flax a as the mustar green feed the green feed Make a suffici ilar to those in some place in some place disturbed by a continuous Cover the bottom of fine earth; fill in a finixed grain. Keep day three to four inches high to feed. The boxes she covers, and be covered color is desired in the contents of the egg, expose the growing grain to the sun, which will turn it a dark green, thus giving a deep yellow to the yolks. Cover the bottom

sun, which will turn it a dark green, thus giving a deep yellow to the yolks.

Feed in the open yard during summer. In the morning feed light meal of hard porridge, in V-shaped troughs. Take as much of the mixed grain ration as the fowl will eat during the day and mix two-thirds of it in the litter in box one and the balance mix with the gravel in the gravel box. Also mix each day a quantity of weed seeds in these two boxes. Feed a half ounce per hen every other day of cut bone and meat, also a half-ounce of flax, by scattering so that each hen will get a proper share. Serve table scraps and boiled potatoes in similar fashion. The green grain, lettuce, lawn cuttings, etc., should be provided as much as the hens will eat each day. Give skimmed or buttermilk all they will drink. The evening meal should consist of dry mixed grain all they will eat just before going to roost. No mid-day meals should be given. Hens should have to work for that by scratching it out of the litter, gravel or otherwise.

Good, clean water in which is dropped a lump of bluestone the size of a medium

Good, clean water in which is dropped Good, clean water in which is dropped a lump of bluestone the size of a medium pea, or of green stone twice the size, to each four gallons, should be constantly kept before the flock. Keep house and yard perfectly clean at all times. Do not be afraid to spade or plow up the yard often. Throw the earth into cones five feet high, if possible. Mixing a few gallons of mixed grain into the earth as it is piled up. Thus do and there will be eggs to sell and eat, and no wanton damages to gardens and grain, has been for many years the writer's experience.

### WEAK MEN THIS BELT IS UNTIL YOU ARE CURED

Take my Electric Belt for what it will do for you. Wear it while you sleep at night or while you are resting after your work. You will find it a vitalizer, a tonic to your nerves, a rejuvenator of waning vitality. Use it for any ailment which drugs have failed to cure, and you will never cease praising it.

I claim that I can cure weak men; that I can pump new life into worn-out bodies; that I can cure your pains and aches, limber up your joints and make you feel as frisky and vigorous as you ever did in your life. That's claiming a good deal, but I have got a good remedy and know it well enough to take all the risk if you will pay me when you are cured.

No man can lose on this. If the cure is worth the price, you don't have to pay

me when you are cured.

No man can lose on this. If the cure is worth the price, you don't have to pay for it until you get it. When you are ready to say you are a big, husky and frisky specimen of vigorous manhood; that you haven't got an ache or pain in your whole body and that you feel better than you ever did in your life. I get paid. If you can't say it after using my Belt for three months, then give me back my old Belt, and I won't ask a cent. All I ask is security while you use it.

Anyway, my patient returned the Belt and said I hadn't done him any good. He said he thought I had treated him honestly, and wanted to pay me the cost of the Belt, because it couldn't be used again. I refused and told him that I had made a contract to cure him or get nothing, and I wouldn't take a dollar I hadn't earned.

Dear Sir:—I have been wearing you Belt a month now, and it is certainly helping me. My food digests better than it did and my bowels move more regularly. I am not as constipated as I was, and sleep better than I did. My back is getting stronger and I do not have to pass water as often and the burning sensation is gone. I have had no night losses since wearing the Belt, and my private organs are getting stronger—EDD. BODELL, Clover Bar, Alta.

Dear Sir :— I have been wearing you Belt a month now, and it is certainly helping me. Mean move more regularly. I am not as constipated as I was, and sleep better than I did. My be water as often and the burning sensation is gone. I have had no night losses since wearing to stronger—EDD. BODELL, Clover Bar, Alta.

My Belt is easy to use; put it on when you go to bed; you feel the glowing heat from it (no sting or burn, as in old style belts), and you feel the nerves tingle with the new life flowing into them. You get up in the morning feeling like a two-year-old.

Wherever you are, I think I can give you the name of a man in your town that I have cured. Just send me your address and let me try. This is my twenty-fourth year in the business of pumping new vim into worn-out humanity, and I've got cures in nearly every town on the map.

If you will come and see me, I will explain it to you. If you can't call, let me send you my book full of the things a man finds inspiring to strength and ourage. Free if you send this ad.

# FROST&WOC Improved Binders

EPENDABILITY" practically sums up the whole question about a Binder. When your crops need harvesting, you must have a machine that will do your work quickly and efficiently without a hitch from start to finish. And that machine is the Frost and Wood Binder—it is built in one of the largest factories in Canada where farm implements of the highest quality are being constantly improved—all that is latest and best has been put into this one successful Binder.

ROLLER BEARINGS of generous size fit neatly and accurately in their boxes and the liberal way in which we have equipped this machine with this class of bearings accounts for its remarkable light draft and also ensures very small cost for repairs.

AUTOMATIC FORCE FEED.
Our Binder is capable of elevating whatever the machine cuts—from lightest to the heaviest grains. The upper canvas on the elevator is so arranged that it will grip the straw as it is delivered from the platform. Hard to explain without an illustration but our booklet "Binder Facts" gives all details. Can we send you this book?

OTICE that three of the arms of the Sprocket Wheel are shorter than the other three which accounts for greater power and speedier work.

When the grain is being compressed and tied, the packer arms require all the power they can get to make tight sheaves and the chain which drives the Eccentric Sprocket is then pulling over the long arms of the wheel, exerting a steady powerful draw. After the bundles are compressed and tied the chain has reached the short arms of the Eccentric Sprocket and must therefore travel faster, thus the bundles are discharged quickly and everything is ready again for another bundle to be compressed, tied and discharged. Actual experience in the field has proved the superiority of this action on our Binder.

any of our factory we thoroughly in all k We make it a point sheaves are tied secuthere are no "misses" at of twine. The binding at can be regulated to tie at sheaf, we will guarantee the elof this knotter in every particular.

the power, cuts, elevates and ties grain is a substantial piece of machinery capable of standing the heaviest strain it may be put to. It has a double row of spokes arranged on the "staggered" principle with the centres securely held in the wheel hub casting and with ends firmly fastened through the rim—absolutely no chance of them working loose. The large Angle-steel Mudhugs rivetted to the outside of the rim prevent the wheel from skidding on soft ground or dry slippery stubble—the wide tire makes work easy under all conditions.

OTHER GOOD POINTS. You could not wish for a sturdier, stronger foundation than we put on our Binder—in fact the whole machine is built for hard wear and tear and time and experience have demonstrated that the Frost and Wood Improved Binder is positively the strongest and most durable machine of its kind in Canada. Don't fail to see one of our Agents' dealers or write them direct for further particulars and booklet—it will save you both time and money.
